

ANNOUNCEMENTS

FOURTH INTERNATIONAL SYMPOSIUM ON INNOVATIVE NUMERICAL ANALYSIS IN ENGINEERING AND APPLIED SCIENCE

Atlanta, Georgia, March 24-28, 1986

The Fourth International Symposium on Innovative Numerical Analysis in Engineering and Applied Science will be held at the Georgia Institute of Technology in honor of their centennial, 1985-86. This meeting is jointly sponsored by the International Society for Innovative Analysis and the Groupe pour l'Avancement des Methodes Numeriques dans les sciences de l'Ingenieur and follows previous meetings in Paris (1977), Montreal (1980), and Paris (1983).

The purpose of the meeting is to provide a forum for technology transfer between active contributors and users in the field of numerical analysis. Official languages will be French and English and proceedings will be available at the conference.

CISM SEMINAR

SIMPLIFIED ANALYSIS OF INELASTIC STRUCTURES SUBJECTED TO STATICAL OR DYNAMICAL CYCLIC LOADINGS

Ecole Polytechnique, Palaiseau, France, 7-10 October 1985

The objective of the seminar is the comparison among various existing methods which are available for evaluating the deformation and stress state in an inelastic structure.

There will be a maximum of five invited lecturers. Each lecturer will make a three-hour detailed presentation of the foundation of his method, and will give some practical applications of his procedure.

During a final discussion session, it is expected that under the guidance of a moderator, a set of recommendations for industrial design applications will be generated.
