

## ERRATUM

M. Kleiber, Numerical study on necking-type bifurcations in void-containing elastic-plastic material. *Int. J. Solids Structures* 20 (3), 191-210 (1984).

The correct formulae (2.22), (2.23), (2.24), (2.32), (2.33), (2.35) and (3.13) are given below:

$$\zeta = \zeta \frac{(\omega + f \sum s)^2}{1-f} - \frac{(c-f)\sigma_M}{2} \left[ 3f(1-f)s + 2 \frac{\hat{K}}{\sigma_M} \zeta \frac{\omega + f \sum s}{1-f} \right], \quad (2.22)$$

$$\beta = \frac{\sqrt{3}}{2} fs, \quad (2.23)$$

$$\mu = \beta + \frac{(c-f)\hat{K}}{\sqrt{3}}, \quad (2.24)$$

$$\zeta^* = \zeta^* + \bar{s}_y^1 s_y^2 = \zeta + 3G\omega + 3\beta\mu K, \quad (2.32)$$

$$L_{ijkl} = \frac{E}{1+\nu} \left[ \frac{\nu}{1-2\nu} \delta_{ij}\delta_{kl} + \frac{1}{2}(\delta_{ik}\delta_{jl} + \delta_{il}\delta_{jk}) \right] \\ - \frac{(G(\sqrt{3}\sigma_y^p/\sigma_M) + K\beta\delta_y)(G(\sqrt{3}\sigma_{kl}^p/\sigma_M) + K\mu\delta_{kl})}{\frac{1}{2}\zeta + G\omega + \mu\beta K} \\ - \frac{1}{2}(\sigma_{ik}\delta_{jl} + \sigma_{jk}\delta_{il} + \sigma_{il}\delta_{jk} + \sigma_{jl}\delta_{ik}) \quad (2.33)$$

$$= \left( K - \frac{2}{3}G \right) \delta_{ij}\delta_{kl} + G(\delta_{ik}\delta_{jl} + \delta_{il}\delta_{jk}) \\ - \frac{(G(\sqrt{3}\sigma_y^p/\sigma_M) + K\beta\delta_y)(G(\sqrt{3}\sigma_{kl}^p/\sigma_M) + K\mu\delta_{kl})}{\frac{1}{2}\zeta + G\omega + \mu\beta K} \\ - \frac{1}{2}(\sigma_{ik}\delta_{jl} + \sigma_{jk}\delta_{il} + \sigma_{il}\delta_{jk} + \sigma_{jl}\delta_{ik}),$$

$$d_{ij}^{(p)} = s_y^1 \frac{s_{kl}^2 L_{klmn}^{(e)} d_{mn}}{\zeta^* + s_{kl}^1 L_{klmn}^{(e)} s_{mn}^2} = s_y^1 \frac{s_{kl}^2 \dot{\sigma}_{kl}}{\zeta + 3G\omega + 3\mu\beta K}, \quad (2.35)$$

$$\Delta \varepsilon_{ij}^{(p)(k)} = {}^+s_{ij}^{1(k)} \left[ \frac{{}^+\bar{\sigma}^{*(k)} - {}^-\bar{\sigma}}{-\zeta + 3G(\omega + {}^-\beta\mu(K/G))} + \sqrt{3}\mu \frac{{}^+\sigma_H^{*(k)} - {}^-\sigma_H}{-\zeta + 3G(\omega + {}^-\beta\mu(K/G))} \right]. \quad (3.13)$$

Also, line 5 from the bottom of p. 204 should read:

C1—fundamental solution for elastic-plastic void-containing material without imperfections.
