

ANNOUNCEMENT

INFORMATION RETRIEVAL SERVICE ON FE AND BE LITERATURE AND SOFTWARE

Linköping University, Department of Mechanical Engineering is offering an information retrieval service from their database MAKEBASE. This information retrieval is directed mainly on subject searches.

MAKEBASE is a database containing information on 1700 finite element and boundary element programs, and 40,000 literature references. It is updated daily. The information sources included are books, book chapters, journal papers, conference proceeding papers, theses and dissertations. All fields of interest in connection with the finite elements and boundary elements are included, except the fluid mechanics.

Information retrieval can be done retrospectively to 1976.

For more detailed information contact :
