

A LIST OF PUBLICATIONS BY JOHN DUNDURS

1. J. Dundurs. A method for analyzing deformations of plane trusses. *Publications*, Vol. **18**, pp. 1–14, International Association for Bridge and Structural Engineering, Zürich (1958).
2. J. Dundurs and M. Hetényi. The elastic plane with a circular insert, loaded by a radial force. *Journal of Applied Mechanics* **28**, 103–111 (1961).
3. J. Dundurs. Die seitlich elastisch eingebettete keilförmige Scheibe unter Spitzenbelastung. *Ingenieur-Archiv* **31**, 144–148 (1962).
4. M. Hetényi and J. Dundurs. The elastic plane with a circular insert, loaded by a tangentially directed force. *Journal of Applied Mechanics* **29**, 362–368 (1962).
5. J. Dundurs. Force in smoothly joined elastic half-planes. *Journal of the Engineering Mechanics Division, Proceedings of the American Society of Civil Engineers* **88**, No. EM5, 25–40 (1962).
6. J. Dundurs and T.-M. Lee. Flexure by a concentrated force of the infinite plate on a circular support. *Journal of Applied Mechanics* **30**, 225–231 (1963); **31**, 364–365 (1964).
7. J. Dundurs. Concentrated force in an elastically embedded disk. *Journal of Applied Mechanics* **30**, 568–570 (1963).
8. A. Jahanshahi and J. Dundurs. Concentrated forces on compressed plates and related problems for moving loads. *Journal of Applied Mechanics* **31**, 83–87 (1964).
9. O. C. Zienkiewicz and J. Dundurs. Thermal deformations and stresses in visco-elastic plates. *Proceedings of the Conference on Thermal Loading and Creep in Structures and Components*, pp. 241–248, Institution of Mechanical Engineers, London (1964).
10. J. Dundurs and T. Mura. Interaction between an edge dislocation and a circular inclusion. *Journal of the Mechanics and Physics of Solids* **12**, 177–189 (1964).
11. J. Dundurs and O. C. Zienkiewicz. Stresses around circular inclusions due to thermal gradients with particular reference to reinforced concrete. *Proceedings of the American Concrete Institute* **61**, 1523–1533 (1964).
12. J. Dundurs and D. L. Guell. Center of dilatation and thermal stresses in joined elastic half-spaces. *Developments in Theoretical and Applied Mechanics*, Vol. 2 (ed. W. A. Shaw), pp. 199–211, Pergamon Press (1965).
13. J. Dundurs and A. Jahanshahi. Concentrated forces on unidirectionally stretched plates. *Quarterly Journal of Mechanics and Applied Mathematics* **18**, 129–139 (1965).
14. J. Dundurs and G. P. Sendeckyj. Edge dislocation inside a circular inclusion. *Journal of the Mechanics and Physics of Solids* **13**, 141–147 (1965).
15. J. Dundurs and J. F. Ely. Eine Deutung der Jefferyschen Lösung für das exzentrische Kreisrohr. *Zeitschrift für angewandte Mathematik und Mechanik* **45**, 262–263 (1965).
16. J. Dundurs and M. Hetényi. Transmission of force between two semi-infinite solids. *Journal of Applied Mechanics* **32**, 671–674 (1965).
17. J. Dundurs and G. P. Sendeckyj. Behavior of an edge dislocation near a bimetallic interface. *Journal of Applied Physics* **36**, 3353–3354 (1965).
18. J. Dundurs. A pedagogic analogy between beams and free edges in plate theory. *Bulletin of Mechanical Engineering Education* **5**, 51–54 (1966).
19. J. Dundurs, K. Fukui and T. Fukui. Concentrated force near a smooth circular inclusion. *Journal of Applied Mechanics* **33**, 871–876 (1966); **34**, 794 (1967).

20. K. Fukui, T. Fukui and J. Dundurs. Two joined different semi-infinite plates subjected to moment or doublet (in Japanese). *Transactions of the Japan Society of Mechanical Engineers* **32**, 403–410 (1966).
21. K. Fukui, J. Dundurs and T. Fukui. The elastic plane with a circular insert, loaded by a concentrated moment. *Bulletin of JSME* **10**, 9–14 (1967). Japanese translation in *Transactions of the Japan Society of Mechanical Engineers* **32**, 695–699 (1966).
22. J. Dundurs, S.-L. Lee and P. A. Hampe. Direct analysis of continuous beam-columns. *Journal of the Structural Division, Proceedings of the American Society of Civil Engineers* **93**, No. ST3, 1–10 (1967).
23. J. Dundurs. Effect of elastic constants on stress in a composite under plane deformation. *Journal of Composite Materials* **1**, 310–322 (1967).
24. J. Dundurs and M. Stippes. Nature of singularity for a point load at the edge of a plate in bending. *International Journal of Solids and Structures* **3**, 795–798 (1967).
25. J. Dundurs. On the interaction of a screw dislocation with inhomogeneities. *Recent Advances in Engineering Science*, Vol. 2 (ed. A. C. Eringen), pp. 223–233, Gordon and Breach (1967).
26. M. E. Agabein, S.-L. Lee and J. Dundurs. Bending of an annular slab supported on columns. *Journal of the Franklin Institute* **284**, 300–307 (1967).
27. J. Dundurs. Dependence of stress on Poisson's ratio in plane elasticity. *International Journal of Solids and Structures* **3**, 1013–1021 (1967). Reprinted in *Mechanics 1970* (ed. N. C. Lind), pp. 211–218, American Academy of Mechanics (1970).
28. D. L. Guell and J. Dundurs. Further results on center of dilatation and residual stresses in joined elastic half-spaces. *Developments in Theoretical and Applied Mechanics*, Vol. 3 (ed. W. A. Shaw), pp. 105–115, Pergamon Press (1967).
29. J. Dundurs and G. P. Sendeckyj. Interaction of dislocations with inhomogeneities in presence of applied stresses. *Composite Materials Workshop* (ed. S. W. Tsai, J. C. Halpin and N. J. Pagano), pp. 44–64, Technomic Publishing Co. (1968).
30. H. J. Kosherick, J. Dundurs and S.-L. Lee. Annular slabs in circular core buildings. *Journal of the Structural Division, Proceedings of the American Society of Civil Engineers* **94**, 471–483 (1968).
31. M. Stippes and J. Dundurs. Behavior of an edge dislocation in presence of a surface layer. *Developments in Mechanics*, Vol. 4 (ed. J. E. Cermak and J. R. Goodman), pp. 559–569, Johnson Publishing Co. (1968).
32. R. Amon and J. Dundurs. Circular plate with supported edge-beam. *Journal of the Engineering Mechanics Division, Proceedings of the American Society of Civil Engineers* **94**, 731–742 (1968).
33. R. Weeks, J. Dundurs and M. Stippes. Exact analysis of an edge dislocation near a surface layer. *International Journal of Engineering Science* **6**, 365–372 (1968).
34. J. Dundurs. Analogy between concentrated forces and edge dislocations. *Journal of Applied Physics* **39**, 4152–4156 (1968).
35. J. Dundurs and M. Stippes. Elastic interaction of a point defect with a surface layer. *Recent Advances in Engineering Science*, Vol. 3 (ed. A. C. Eringen), pp. 323–336, Gordon and Breach (1968).
36. R. W. Gerstner and J. Dundurs. Representation of stress concentration factors for a composite in plane strain. *Journal of Composite Materials* **3**, 108–115 (1969).
37. J. Dundurs. Elastic interaction of dislocations with inhomogeneities. *Mathematical Theory of Dislocations* (ed. T. Mura), pp. 70–115, American Society of Mechanical Engineers, New York (1969).
38. J. Dundurs. Discussion of a paper by D. B. Bogy. *Journal of Applied Mechanics* **36**, 650–652 (1969).
39. J. Dundurs and A. C. Gangadharan. Edge dislocation near an inclusion with a slipping interface. *Journal of the Mechanics and Physics of Solids* **17**, 459–471 (1969).
40. J. Dundurs and M.-S. Lee. Stress concentrations due to edge dislocation pile-ups in two-phase materials. *Scripta Metallurgica* **4**, 313–314 (1970).
41. J. Dundurs and C. F. Hsieh. Dependence on elastic constants of some residual and

- dislocation stresses in a composite. *Developments in Theoretical and Applied Mechanics*, Vol. 4 (ed. D. Frederick), pp. 103–115, Pergamon Press (1970).
42. J. Dundurs. Some properties of elastic stresses in a composite. *Recent Advances in Engineering Science*, Vol. 5 (ed. A. C. Eringen), pp. 203–216, Gordon and Breach (1970).
 43. J. Dundurs and M. Stippes. Role of elastic constants in certain contact problems. *Journal of Applied Mechanics* **37**, 965–970 (1970). Reprinted in *Mechanics 1971* (ed. N. C. Lind), pp. 267–272, American Academy of Mechanics (1971).
 44. T. Mura and J. Dundurs. Deformational modes and microstructure. *Structure, Solid Mechanics and Engineering Design* (ed. M. Te'eni), pp. 3–12, Wiley-Interscience (1971).
 45. J. B. Wachtman, Jr. and J. Dundurs. Large localized surface stresses caused by thermal expansion anisotropy. *Journal of the American Ceramic Society* **54**, 525–526 (1971).
 46. J. Dundurs and M. G. Samuchin. Transmission of concentrated forces into prismatic shells — I. *International Journal of Solids and Structures* **7**, 1627–1640 (1971).
 47. N. J. Salamon and J. Dundurs. Elastic fields of a dislocation loop in a two-phase material. *Journal of Elasticity* **1**, 153–164 (1971).
 48. J. Dundurs and N. J. Salamon. Circular prismatic dislocation loop in a two-phase material. *Physica Status Solidi (b)* **50**, 125–133 (1972).
 49. M. Comninou and J. Dundurs. Long-range interaction between a screw dislocation and a spherical inclusion. *Journal of Applied Physics* **43**, 2461–2463 (1972).
 50. J. Dundurs and M.-S. Lee. Stress concentration at a sharp edge in contact problems. *Journal of Elasticity* **2**, 109–112 (1972).
 51. K. C. Tsai, J. Dundurs and L. M. Keer. Contact between an elastic layer with a slightly curved bottom and a substrate. *Journal of Applied Mechanics* **39**, 821–823 (1972).
 52. J. Dundurs. Dislocation and disclination contents of line defects. *Physica Status Solidi (b)* **53**, 157–162 (1972).
 53. M.-S. Lee and J. Dundurs. On the Peierls force. *Philosophical Magazine* **26**, 929–933 (1972).
 54. J. Dundurs. Load and self-stresses in an elastic body. *Journal of Elasticity* **2**, 211–213 (1972).
 55. L. M. Keer, J. Dundurs and K. C. Tsai. Problems involving a receding contact between a layer and a half space. *Journal of Applied Mechanics* **39**, 1115–1120 (1972).
 56. M.-S. Lee and J. Dundurs. Edge dislocation in a surface layer. *International Journal of Engineering Science* **11**, 87–94 (1973).
 57. H. H. Kuo, T. Mura and J. Dundurs. Moving circular twist disclination loop in homogeneous and two-phase materials. *International Journal of Engineering Science* **11**, 193–201 (1973).
 58. M. G. Samuchin and J. Dundurs. Transmission of concentrated forces into prismatic shells — II. *International Journal of Solids and Structures* **9**, 269–278 (1973).
 59. C. F. Hsieh and J. Dundurs. Continuous distributions of dislocations in bonded half spaces. *International Journal of Engineering Science* **11**, 933–951 (1973).
 60. L. M. Keer, J. Dundurs and K. Kiattikomol. Separation of a smooth circular inclusion from a matrix. *International Journal of Engineering Science* **11**, 1221–1233 (1973).
 61. J. Dundurs, K. C. Tsai and L. M. Keer. Contact between elastic bodies with wavy surfaces. *Journal of Elasticity* **3**, 109–115 (1973).
