KEYWORDS

International Journal of Solids and Structures has traditionally contained author indexes and contents lists at the end of each year. Useful though these are, we believe that they would be enhanced by the addition of indexes compiled from keywords associated with each paper. This would allow readers to identify groups of papers in similar areas.

In an electronic environment, the need for a uniform keyword system is particularly important to facilitate effective information search and retrieval. To ensure a consistent approach we have prepared a list of **preferred** keywords for use. This list is not exhaustive and should be used as a guideline. If you feel there are serious omissions please do not hesitate to contact the Editor-in-Chief or Publisher to ensure that new terms are added.

Absorption Compliance composite Dynamic Acoustic Composite materials Eigenvalues Adaptive structures Compression Elastic Adhesion Computational conical Elastic-plastic Ageing of materials Concentration Elasticity **Algorithms** Concrete Elastoelasticity Alloy Consolidation Elastomers Anisotropic Constitutive Elastoplasticity Arches Contact Energy methods Asymptotic Containment structures Energy release rate Axially Continuum Euler-Bernoulli beam Axisymmetric Control Experimental techniques

Ballistics Converging **Explosions** Bar Cosserat Failure Beam Crack Fastening Bending Crack arrest Fatigue Fibre reinforced Biaxial Crack-tip Bifurcation Finite deformation Creep Biharmonic equation Cross-section Finite differences **Bimaterial** Cross-ply Finite element **Biomechanics** Crystals Flexure Bonded Cyclic Flow-rule Bone Cylinder Flutter

Boundary conditions Damage criteria Foam structures Boundary element **Damping** Foundation Boundary value Debonding Fractals Branching Decay Fracture **Brittle** Decomposition Frames Buckling Deformable bodies Free edge Cables Delamination Friction Cantilever Design Frictional

Ceramics Diffraction Functionally graded
Chains Dipole Galerkin

Chains Dipole Galerkin
Chaos Discontinuities Geomechanics
Coastal structures Disk Granular media
Collocation Dislocations Green function
Column Dispersion Ground structures

Compaction Displacement Half-space Complex variable Diverging Hardening
