PERGAMON

International Journal of Solids and Structures 37 (2000) 7529–7531

INTERNATIONAL JOURNAL OF SOLIDS and STRUCTURES

www.elsevier.com/locate/ijsolstr

Keywords

International Journal of Solids and Structures has traditionally contained author indexes and contents lists at the end of each year. Useful though these are, we believe that they would be enhanced by the addition of indexes compiled from keywords associated with each paper. This would allow readers to identify groups of papers in similar areas.

In an electronic environment, the need for a uniform keyword system is particularly important to facilitate effective information search and retrieval. To ensure a consistent approach we have prepared a list of **preferred** keywords for use. This list is not exhaustive and should be used as a guideline. If you feel there are serious omissions please do not hesitate to contact the Editor-in-Chief or Publisher to ensure that new terms are added.

Absorption
Acoustic
Adaptive structures
Adhesion
Ageing of materials
Algorithms
Alloy
Anisotropic
Arches
Asymptotic
Axially
Axisymmetric
Ballistics
Bar
Beam
Bending
Biaxial
Bifurcation
Biharmonic equation
Bimaterial
Biomechanics
Bonded
Bone
Boundary conditions
Boundary element
Boundary value
Branching
Brittle
Buckling
Cables
Cantilever
Ceramics
Chains
Chaos
Coastal structures
Collocation
Column
Compaction
Complex variable
Compliance composite
Composite materials
Compression
Computational conical
Concentration
Concrete
Consolidation
Constitutive
Contact
Containment structures
Continuum
Control
Converging
Cosserat
Crack
Crack arrest
Crack-tip
Creep
Cross-section
Cross-ply
Crystals
Cyclic
Cylinder
Damage criteria
Damping
Debonding
Decay
Decomposition
Deformable bodies
Delamination
Design
Diffraction
Dipole
Discontinuities
Disk
Dislocations
Dispersion
Displacement
Diverging
Dynamic
Eigenvalues
Elastic
Elastic–plastic
Elasticity
Elastoelasticity
Elastomers
Elastoplasticity
Energy methods
Energy release rate
Euler–Bernoulli beam
Experimental techniques
Explosions
Failure
Fastening

PII: S0020-7683(00)00319-X

Fatigue
Fibre reinforced
Finite deformation
Finite differences
Finite element
Flexure
Flow-rule
Flutter
Foam structures
Foundation
Fractals
Fracture
Frames
Free edge
Friction
Frictional
Functionally graded
Galerkin
Geomechanics
Granular media
Green function
Ground structures
Half-space
Hardening
Higher order
Homogeneous
Homogenization
Honeycomb structures
Hybrid methods
Impact
Imperfections
Impulsive loading
Inclusions
Indentation
Inertia
Instability
Integral equation
Interaction
Interface
Interlaminar
