

## Erratum 1

*Received February 17, 2002*

The following is a correction to the paper titled "Prediction of Critical Properties of Mixtures from the PRSV-2 Equation of State: A Correction for Predicted Critical Volumes" by S. I. Abu-Eishah that appeared in *International Journal of Thermophysics* **20**:1557 (1999).

The last sentence of the second paragraph on page 1561 reads: "Then the corrected value of the critical volume is calculated as the value of  $v_c$  calculated from the PRSV-2 equation of state minus one-half the value of  $ZRT_c/P_c$ ." This sentence should be corrected to read "Then the corrected value of the critical volume is calculated as the value of  $v_p$  calculated from the PRSV-2 equation of state divided by the parameter  $C_c$ , that is,  $v_c = v_p/C_c$ ."

## Erratum 2

*Received February 17, 2002*

The following are corrections to the paper titled “A New Correlation for Prediction of the Kinematic Viscosity of Crude Oil Fractions as a Function of Temperature, API Gravity, and 50% Boiling Point Temperature” by S. I. Abu-Eishah that appeared in *International Journal of Thermophysics* 20:1425 (1999).

The variable  $T$  in the denominator of the second term of Eq. (3) on page 1427 should read  $B$ . Reference 1 in the third line of the second paragraph on page 1430 should be [7].
