EDITORIAL

As the war spreads more and more over this world of ours, it becomes more and more difficult for us to keep abreast of the news on short wave radio stations. With mail either ended or greatly delayed, messages from the stations are received far too late to be of help. Our overseas members, too, have a hard time getting information to us. This puts more and more work on the shoulders of our American reporters.

For a time we considered appointing regular listeners to certain stations, such as one or two listeners to keep us informed on Russian stations, one or two to listen and report on German stations, etc. But, we realized that no one or two persons can hear all of these stations and that it requires the combined efforts of many listeners to keep us up-to-date on these and all other stations.

The International Short Wave Club is fortunate in having some of the world's best short wave listeners in our club. We are lucky, indeed, to have many famous DXers writing to us each month. Their help is considerable. Never-the-less, we need reports now from every direction, not only on new stations coming on the air, but of others who may move to a new spot on the dial, be heard on a schedule different from what we publish and such things. So, if anyone reading this page happens to hear something not listed in our list, just send us a card or letter. By co-operating with us, you are helping yourself.

SHORT NOTES ABOUT SHORT WAVES

Leon A. Hutchinson, 8 Willow Street, Milford, New Hampshire, is in a hospital and badly in need of some cheering up. He is a pretty sick man. We suggest that every thoughtful member drop him a card or letter today. He has been a fine reporter and a good friend of the club and you can show your appreciation by writing him now.—Last month we got pages 6 and 8 mixed up, the first time this has ever happened in our twelve years. To read that issue correctly, read page 5, then page 8 page 7, page 6 and then on to 9. In other words, turn to page 6 for page 8.—Nicola Cannata of Chicago, Illinois, got us a new member.—A. Wendell Field of San Diego, California. is trying to get us members.—Readers who happen to get this publication through the kindness of a radio manufacturer may send us reports just like an ordinary member of the club, When their free editions are concluded by that manufacturer, they can

subscribe for the magazine by writing to us direct at East Liverpool. Ohio.—Many people have asked us if they should buy a receiver today in view of the fact that National defense will soon take much valuable Well, the answer is this. Either an inferior substitute will have to be used or the price of the receiver increased. Most manufacturers are preparing for the later course. It would pay to buy now, before prices rise or before inferior material is substituted. --- Any member of the club who can not make use of their magazine because they are now in the army, navy or marines may get the remaining amount of their membership fees upon request and any person who can use the magazine but can not afford to get it for the same reason may get it free by writing us. --- Mills Van Bergen, Syracuse, New York, again brought us a new member and Richard D. Cooper of Norwood, Ohio, brought us one, too. Frank B. Shuler of Hamilton, Ohio, showed us his faith in the future of the club by paying up for ten more years.

AMATEURS WANTED

All branches of our armed service need and want trained radio amateurs. All such men may join the branch of service of their choice by enlisting at their local enlisting branch. Those who are chosen will receive several weeks of training and will then assume posts according to their ability. Those accepted will receive a pay greater than that which is received by the ordinary enlisted man and will assume offices several steps higher than a regular soldier, sailor or marine. The navy and the signal corp also want men who are familiar with the repair and installation of radio transmitters and receivers. For further information write or call at your nearest branch.

THE NEWS LINE-UP

One thing nice about living in a democracy is the fact that we are allowed to listen to the claims of enemies as well as our friends. This is something for which short wave fans can be thankful. Here is the English broadcasts schedules as we have it to date.

Our friends. Midnight —Over GSL, 6.11; GSW, 7.23; GSC, 9.58; ZRL 9.61. At 1:30 A.M.—over VLG3 on 11.71. At 6:20 A.M.—over VLW2 on on 9.65 mc At 6:30 A.M.—over VLG5on 11.88 mc. and VLR on 9.58 mc. At 8:00 A.M.—over GSF on 15.14 mc. and GSV on 17.81 mc. At 6:30 P.M.—over Moscow stations on 15.11 and other frequencies. At 8:00 P.M.—over GSC on 9.58 mc. M.—over DXP on 6.03 mc., DXJ on 7.24 mc., 2RO-3 on 9.63 mc., 2RO-18 on 9.76 mc., and 2RO-4 on 11.81 mc. At about 11:30 P.M. DXP and DXJ.

What many people call "skill" in tuning for short wave stations is nothing more or less than knowing WHEN and WHERE to tune for stations. Nearly all short wave stations are experimental and change their wave lengths or schedules almost without notice. To know when these changes take place is as important to successful reception as having a good receiver.

The time is given in Eastern Standard. Add five hours for Greenwich Mean Time.

ON THE AIR

Stations in larger type are most commonly heard. Figures indicate the hour the station is on the air. When 1 or 1 is shown half hour. When it appears at the end of a group of figures, the station signs off at the quarter hour at the beginning of a group of figures, it means the station starts broadcasting on the quarter hour or Stations appearing in smaller type are not heard often due to their low power or time of operation. All stations, for example, that show 8 A.M. are on the air at 8:00 A.M., E.S.T. or half hour. S at the end of a list means the station signs off on the hour.
