## ANNOUNCEMENT

### Preliminary Announcement and Invitation to the INTERNATIONAL SYMPOSIUM ON COMPUTATIONAL FLUID DYNAMICS—SYDNEY

in conjunction with CTAC–87  
Sydney, Australia, 23–27 August 1987

Following the successful format established with the ISCFD—Tokyo (September 1985), this conference will provide an interactive forum for engineers, scientists, mathematicians and numerical analysts interested in the development of more efficient computational techniques and their application to fluid flow problems of engineering and scientific importance.

Computational techniques stressed will include the finite difference, finite element, boundary element and spectral methods. Papers are invited in the fluid flow and closely related areas. Format details and dates will be provided in the next announcement.

As with the ISCFD—Tokyo, Keynote speakers will be distinguished research workers drawn from the international community and the proceedings will be published by North–Holland. The conference will be held at Sydney University which is centrally located with social activities organized to take advantage of the special events and exhibits being prepared to celebrate the Australian Bicentenary early in 1988.

To be put on the mailing list for subsequent announcements please contact: Dr. C. A. J. Fletcher, CTAC–87, Dept. of Mechanical Engineering, University of Sydney, N. S. W. 2006, Australia.
