H. L. EVANS: Mass transfer through laminar boundary layers—7. Further similar solutions to the b-equation for the case $B = 0$

V. A. KIRILLIN, A. E. SCHEINDLIN and V. Y. CHEKHOVSKOY: Experimental determination of the enthalpy and heat capacity of molybdenum up to 2337°C

P. N. ROMANENKO, A. I. LEONT'EV and A. N. OBLIVIN: Investigation on resistance and heat transfer at turbulent flow in axisymmetrical channels with longitudinal pressure gradient

P. S. LYKOUDIS: Natural convection of an electrically conducting fluid in the presence of a magnetic field

SH. N. PLYAT: Heat and mass transfer of circular hollow cylinders under boundary conditions of the second kind

V. P. MOTULEVICH: Heat and mass transfer in a frontal point of blunt bodies in a liquid flow at the pressure of heterogeneous chemical reactions

G. POOTS: The application of integral methods to the solution of problems solving the solidification of liquids initially at fusion temperature

G. POOTS: An approximate treatment of a heat combustion problem involving a two dimensional solidification front

I. T. ELPERIN: Terms, letter symbols and definitions on heat and mass transfer used in the Soviet Union

H. L. EVANS: Mass transfer through laminar boundary layers—8. Further solutions to the velocity equation

M. S. SMIRNOV: On a system of differential equations for highly intensive heat and mass transfer
