JOURNAL OF ENGINEERING PHYSICS

(Published in the U.S.S.R. in Russian with English abstracts)

Volume 7, No. 3

March, 1964

I. T. SHVETS and E. P. DYBAN: Contact heat transfer between plane metallic surfaces	3
V. I. KASPER: Study of heating kinetics and calculation of grain drying in ascending gas flow	10
I. L. LYUBOSHITS and P. S. KUTS: The influence of a drying process version on the drying rate of peat-insulating slabs	17
L. S. SLOBODKIN: Approximate method for calculating heating kinetics of moist material in a fluidized bed under oscillating conditions	21
M. M. KUSAKOV, L. A. KONOVALOVA and A. A. KONSTANTINOV: High-pressure rotary viscometer for small amounts of liquid	27
V. V. VLASOV: Determination of thermal conductivity of solids by a digital computer	34
V. F. DUKSKY and A. I. SIDOROV: On existence of aerodynamic crisis when a jet of light aerosol or gas propagates in a closed room	42
A. T. SYCHEV: The results of study of a submerged turbulent stream incoming normally to a plane of a flat ceiling	46
D. A. KURTNER: Gas flow temperature in a thin-walled perforated tube of a uniform cross section	54
I. P. SERGEEV: On transient heat transfer in the core of heterogeneous water-moderated water-cooled boiling reactor with natural coolant circulation	57
M. D. MIKHAILOV: Periodic heating of fluid through plates	64
N. N. KOCHUROVA: On condensation coefficients	68
V. I. KUDASHEV: Determination of critical density of substances according to the data in a single-phase region	73
L. A. ROTT: Diffusion in a critical fluid-vapour region	78
N. M. BELYANIN: On gas motion with friction and heat transfer in a channel of a uniform cross section	82
YU. A. SAMOILOVICH: Temperature stresses in a long rectangular prism	86
G. P. KHAUSTOVICH and E. S. GOLOVINA: Peculiarities of high temperature interaction of carbon with gases	92
N. P. MAR'IN: The diffusion of a cloud moving in a variable density medium	97
F. N. YASINSKY: On approximate integration of gas dynamics equations	105
V. S. TANAYEV: On the problem of scheduling the production line operation with one automatic operator	111
F. B. MOIN: Measurement of turbulent combustion rate by the method of burner with flat turbulent flame	115
S. K. ASLANOV: Theoretical analysis of oscillating distribution of flame in tubes	118
YU. N. SHIMANSKY and N. I. SYROMYATNIKOV: Application of regular regime method for heat-transfer investigation in a fluidized bed	121
L. M. GALONEN: Non-linear heat-conduction problem of a plane parallel wall with a heat source dependent on temperature	124

Discussion

YA. Z. KAZAVCHINSKY: Application of classical postulate to the new system of justification of the second law of thermodynamics	128
--	-----

Letter to the Editor

A. KESSLER: Graphs for determining time-dependent temperature field in the finite rods or plates with internal heat sources	134
---	-----

Reader's Guide

<i>International Journal of Heat and Mass Transfer</i> , Vol. 6, December 1963	137
