

# HEAT TRANSFER BIBLIOGRAPHY—JAPANESE WORKS

TAKASHI SATO

Department of Mechanical Engineering, Kyoto University

(Received 13 October 1966)

## APPLICATION AND OUTLOOK

- H. TAKENOCHI and H. FUKUMOTO, Design factors affecting the maximum allowable change of load of once-through boiler, *J. Japan Soc. Mech. Engrs* **69** (569), 752 (1966).
- T. KAWAI, Study on application of dropwise condensation to steam condensers (2nd Rep., Theory of behavior of single water drop on inclined surface), *Trans. Japan. Soc. Mech. Engrs* **32** (233), 107 (1966).
- H. TAKAHAMA, Studies on vortex tubes (3rd Rep., Variations of velocity, temperature and energy with axial distance, and mechanism of energy separation), *Trans. Japan. Soc. Mech. Engrs* **32** (235), 503 (1966).
- J. KIWAKI, T. MORITA, K. OHARA, T. NISHIMURA, S. NOZU, K. TUZIMOTO and M. HOSOKAWA, An experimental study on the heat absorption and the pressure drop in tubes of a small-sized once-through boiler, *Trans. Japan. Soc. Mech. Engrs* **32** (237), 788 (1966).
- Y. SANO and S. NISHIKAWA, Drying of filament in dry spinning, *J. Chem. Engng Japan* **30** (3), 245 (1966).
- R. TŌEI, S. HAYASHI, M. HIRAOKA and T. YAMAMOTO, Calculation method of the drying rate for through flow drying, *J. Chem. Engng Japan* **30** (4), 329 (1966).
- Y. SANO and S. NISHIKAWA, Drying of Polyacrylonitrile filament in dry spinning, *J. Chem. Engng Japan* **30** (4), 335 (1966).
- K. ASANO and S. FUJITA, Vapour-phase mass-transfer coefficients in tray towers, *J. Chem. Engng Japan* **30** (6), 500 (1966).
- H. TAKAHAMA, S. TANAKA, T. IKEDA and H. SUZUKI, An experimental study of vortex tube with double row nozzle, *Mem. Fac. Engng Nagoya Univ.* **17** (1), 37 (1965).
- Y. FURUYA, E. TANAKA and T. KUSHIDA, An improved hot-wire anemometer, *Mem. Fac. Engng Nagoya Univ.* **17** (2), 160 (1965).
- K. NAKAMURA, Heat transfer and pressure drop in heat exchangers, *Mitsui Tech. Review* **53**, 29 (1966).
- T. IWASAKI and K. OKAMOTO, An application of conductive sheet to the problems of axisymmetric thermal conduction, *Mitsui Tech. Review* **54**, 37 (1966).

## CHANNEL FLOW

- O. KUGA, Heat transfer in a pipe with non-uniform heat flux, *Trans. Japan. Soc. Mech. Engrs* **32** (233), 83 (1966).
- Y. MORI and K. FUTAGAMI, Forced convective heat transfer in horizontal tubes (2nd Rep., Theoretical study on the effect of buoyancy), *Trans. Japan. Soc. Mech. Engrs* **32** (233), 88 (1966).

- T. FUJII, H. UEHARA and M. TAKEUCHI, Laminar-natural-convection heat transfer from the outer surface of a vertical circular cylinder, *Trans. Japan. Soc. Mech. Engrs* **32** (236), 652 (1966).
- T. MUNAKATA, Mass transfer between rarefied gas flow in tube and tube wall (Analytical study based on slip concept), *Tech. Rep. Kyushu Univ.* **38** (4), 436 (1966).
- M. HISHIDA, Turbulent heat transfer and temperature profile in the thermal entrance region of a circular pipe, *Trans. Japan. Soc. Mech. Engrs* **32** (238), 930 (1966).

## CONVECTIVE HEAT TRANSFER

- K. YAMAGATA, K. NISHIKAWA, S. HASEGAWA, T. FUJII and K. MIYABE, Free convection heat transfer to a supercritical fluid (1st Rep., Experiments on the horizontal small wire), *Trans. Japan. Soc. Mech. Engrs* **32** (233), 98 (1966).
- I. MICHIOYOSHI and R. MATSUMOTO, Heat transfer of slurry flow with internal heat generation (4th Rep., Laminar heat transfer in thermal entrance region between parallel plates for pseudo-plastic fluid and dilatant fluid), *Trans. Japan. Soc. Mech. Engrs* **32** (234), 302 (1966).
- T. FUJII and M. TAKEUCHI, Laminar boundary layer flow on an inclined flat plate with buoyancy effects, *Trans. Japan. Soc. Mech. Engrs* **32** (236), 646 (1966).
- I. MABUCHI, T. TANAKA and Y. SAKAKIBARA, Convective heat transfer from rotating disks (1st Rep., Effect of dissipation energy on laminar heat transfer from a rotating disk in uniform stream), *Trans. Japan. Soc. Mech. Engrs* **32** (237), 753 (1966).
- Y. SANO and S. NISHIKAWA, The effects of baffle plate on heat transfer of fine wires in air flow, *J. Chem. Engng Japan* **30** (2), 135 (1966).
- T. TSUBOUCHI and Y. ŌTA, Experimental study of heat transfer between single pin and air by forced convection, *Rep. Inst. High Speed Mech. Tohoku Univ.* **17** (166), 129 (1965/1966).
- S. AKAGI, Free convection heat transfer of non-Newtonian fluid, *Trans. Japan. Soc. Mech. Engrs* **32** (238), 919 (1966).

## CHANGE OF PHASE

- K. NISHIKAWA, R. SHIMOMURA, M. HATANNO and H. NAGATOMO, Investigation of surface film boiling under free convection (1st Rep., An experiment on small wires), *Trans. Japan. Soc. Mech. Engrs* **32** (237), 762 (1966).

- S. HAYAMA, Self-excited standing wave generated in sub-cooled boiling, *Trans. Japan. Soc. Mech. Engrs* **32** (237), 770 (1966).
- A. INOUE and S. AOKI, Fundamental studies for pressure drop in air-water two phase flow in a vertical pipe, *Trans. Japan. Soc. Mech. Engrs* **32** (238), 940 (1966).
- Y. KATTO and S. YOKOYA, Experimental study of nucleate pool boiling in case of making interference-plate approach to the heating surface, *Trans. Japan. Soc. Mech. Engrs* **32** (238), 948 (1966).
- K. NISHIKAWA, N. KITAYAMA and K. MATSUMOTO, On the multiple characteristics of transition boiling, *Tech. Rep. Kyushu Univ.* **38** (4), 393 (1966).
- K. NISHIKAWA, S. HASEGAWA, N. KITAYAMA and T. SAKAMOTO, The effect of heating surface condition on the transition boiling—the investigation of transition boiling (2nd Rep.), *Tech. Rep. Kyushu Univ.* **38** (4), 399 (1966).

#### MASS TRANSFER

- S. KIKKAWA and M. TAKEDA, Experimental investigation on transpiration cooling (2nd Rep., Cooling effectiveness and heat-transfer performance of gaseous coolant), *Trans. Japan. Soc. Mech. Engrs* **32** (236), 658 (1966).
- R. TŌEI, M. OKAZAKI, K. KUBOTA, K. KATAOKA, K. ŌHASHI and K. MIZUTA, Evaporation from a water drop in the stream of steam-air mixtures, *J. Chem. Engng Japan* **30** (1), 43 (1966).
- K. ONDA, E. SADA and M. NAGASAKA, Measurement of the gas-side mass-transfer coefficient by liquid jet, *J. Chem. Engng Japan* **30** (2), 139 (1966).
- K. ONDA, E. SADA, C. KIDO and S. KAWATAKE, Dependences of the gas-side mass-transfer coefficient on the physical properties of solute, *J. Chem. Engng Japan* **30** (3), 226 (1966).
- S. HOSHINO and K. SATO, Diffusion across stationary liquid-liquid interface, *J. Chem. Engng Japan* **30** (4), 322 (1966).
- K. ASANO and S. FUJITA, Liquid-phase mass-transfer coefficients in tray towers, *J. Chem. Engng Japan* **30** (5), 403 (1966).
- N. WAKAO and S. FUJISHIRO, Discussions of mass-transfer coefficient, *Bull. Fac. Engng Yokohama Nat. Univ.* **15**, 7 (1966).
- K. ONDA, E. SADA and M. NAGASAKA, Measurement of the gas-side mass-transfer coefficient by liquid jet, *Mem. Fac. Engng Nagoya Univ.* **17** (1), 90 (1965).

#### FLOW WITH SEPARATED REGIONS

- Y. OHKI, E. ŌSHIMA, H. INOUE and S. YAGI, Temperature and concentration distribution in a packed bed reactor, *J. Chem. Engng Japan* **30** (4), 341 (1966).
- S. TONE and T. ŌTAKE, Radial heat transfer to granular solids in the stirred bed, *J. Chem. Engng Japan* **30** (6), 495 (1966).

#### HEAT TRANSFER IN PLASMA

- Y. SAKAGUCHI and C. YAMANAKA, Collisionless shock waves in hot plasmas, *Tech. Rep. Osaka Univ.* **16** (693), 153 (1966).
- M. OKADA and H. MARUO, Fundamental study on the new plasma spraying—On the plasma spraying of Ni-Cr-B-Si alloy, *Tech. Rep. Osaka Univ.* **16** (694), 163 (1966).
- T. OKUDA and K. YAMAMOTO, Plasma diffusion in magnetic field, *Mem. Fac. Engng Nagoya Univ.* **17** (1), 37 (1965).
- S. MIYAJIMA, One dimensional steady flow of a plasma, *Mem. Fac. Engng Nagoya Univ.* **17** (1), 74 (1965).

#### RADIANT HEAT TRANSFER

- T. SATŌ, T. KUNITOMO, F. NAKASHIMA and H. FUJII, Radiant heat transfer from luminous flame (2nd Rep., Experimental study in the case of spray combustion of liquid fuel oil), *Trans. Japan. Soc. Mech. Engrs* **32** (234), 319 (1966).
- R. ECHIGO, N. NISHIWAKI and M. HIRATA, A study on the radiation of luminous flames, *Trans. Japan. Soc. Mech. Engrs* **32** (237), 743 (1966).
- S. SUGIYAMA, M. SHIMIZU and S. MOCHIZUKI, Radiative heat transfer in the molten glass, *J. Chem. Engng Japan* **30** (3), 220 (1966).
