

# HEAT TRANSFER BIBLIOGRAPHY—RUSSIAN WORKS

A. V. LUIKOV

Heat and Mass Transfer Institute of the B.S.S.R. Academy of Sciences, Minsk, U.S.S.R.

(Received 1 March 1966)

## BOOKS

- A. D. AL'TSHUL and P. G. KISELEV, *Hydraulics and Aerodynamics. Fundamentals of Fluid Mechanics*. Stroiizdat, Moscow (1965).
- R. G. BARANTSEV, *Lectures on Transonic Gas Dynamics*. Izd. Leningr. Univ., Leningrad (1965).
- A. V. PAVLOV, *Heat Transfer between Freezing and Melting Soils and Atmosphere*. Nauka, Moscow (1965).
- L. S. POLAK, Ed., *Kinetics and Thermodynamics of Chemical Reactions in a Low Temperature Plasma*. (Collected Papers). Nauka, Moscow (1965).
- V. G. IL'IN, *Heat Exchangers of Graphite for Aggressive Media*. Mashinostroenie, Moscow (1965).
- P. K. KONAKOV, Ed., *Heat-Transfer Study in Thermal Power Plants and Installations for Production of Semiconductor Materials*. Vysshaya Shkola, Moscow (1965).
- E. S. SHCHETINKOV, *Physics of Gas Combustion*. Nauka, Moscow (1965).
- V. K. SHCHUKIN, *Heat Transfer in Nature and Engineering*. Nauka, Moscow (1965).
- Thermal Operation of Metallurgical Furnaces*. Sredne-Ural'sk. Knizh. Izd-vo, Sverdlovsk (1965).
- M. I. ZHUKOVSKY and L. M. ZYSINA-MOLOZHEN, Eds., *Aerodynamics and Heat Transfer*, (collected papers). Leningrad (1965).
- E. T. BARTOSH, N. F. VOLKOV and B. A. ROMANOV, On systems of proof of entropy existence in thermodynamics, *Inzh.-Fiz. Zh.* **9** (3), 412 (1965).
- B. N. BIRGER, Steady state of conducting systems, *Inzh.-Fiz. Zh.* **9** (3), 358 (1965).
- V. M. BRODYANSKY and A. B. GRACHEV, A thermodynamic analysis of gas refrigerating installations with a displacer, *Izv. Vyssh. Ucheb. Zaved. Energetika*, (7), 74 (1965).
- I. DYARMATY, A general variation principle of non-equilibrium thermodynamics, *Zh. Fiz. Khim.* **39** (6), 1489 (1965).
- I. T. EL'PERIN, Thermodynamic study of heat and mass transfer in a non-uniform gas-suspension flow, *Inzh.-Fiz. Zh.* **9** (3), 364 (1965).
- V. V. FILIPPOV, On the equation of expansion and compression lines in piston engines and machine tools allowing for heat losses through the cylinder walls, *Uchen. Zap. (Vsesoyuzn. Zaochn. In-t Inzhenerov Zh.-Dor. Transporta)* (15), 32 (1965).
- L. V. GORBUNOV, Dependence of constant pressure thermal capacity on temperature and calculation of thermodynamic values, *Zh. Fiz. Khim.* **39** (6), 1345 (1965).
- A. I. GULYAEV, The Ranque effect at low temperatures, *Inzh.-Fiz. Zh.* **9** (3), 354 (1965).
- V. M. KAZANSKY, Determination of thermodynamic functions of moisture absorbed by a disperse body according to specific evaporation heat, *Inzh.-Fiz. Zh.* **9** (3), 328 (1965).
- YA. Z. KAZAVCHINSKY, Application of thermodynamic similarity to gaseous mixture properties, *Inzh.-Fiz. Zh.* **9** (3), 345 (1965).
- YA. Z. KAZAVCHINSKY, Comments on the paper "Application of classical conceptions to the new system of proof of the Second Law of Thermodynamics" [J. Engng Phys. **3** (12), (1964)] *Inzh.-Fiz. Zh.* **9**, 409 (1965).
- P. M. KESSEL'MAN, P. A. KOTLYAREVSKY and M. M. AFANASIEV, The CO<sub>2</sub> state equation in the range of temperatures from 273 to 4000°K and pressures up to 1000 · 10<sup>5</sup> N/M<sup>2</sup>, *Inzh.-Fiz. Zh.* **9** (4), 527 (1965).
- I. I. KIRENKOV, Development of the thermodynamic temperature scale, *Trudy In-tov Goskomiteta (Gos. Kom. Standartov, Mer i Izmer. Priborov SSSR)* (76), 102 (1965).
- D. P. KOLODNY, General definition of the adiabatic exponent, *Inzh.-Fiz. Zh.* **9** (1), 86 (1965).
- P. K. KONAKOV, On the reciprocity principle of irreversible thermodynamics, *Inzh.-Fiz. Zh.* **9** (3), 369 (1965).
- S. I. KOSTERIN and B. M. PAVLOV, Experimental study of certain thermodynamic properties of low-temperature

## GENERAL

- A. A. GUKHMAN, The similarity theory, its essence, methods and promises, *Khim. Prom.* (7), 448 (1965).
- P. K. KONAKOV, On the mass and energy transfer law, *Inzh.-Fiz. Zh.* **9** (3), 337 (1965).
- O. G. MARTYNEKO, All-Union Scientific Council on "Mass and Heat Transfer in Technological Processes", *Inzh.-Fiz. Zh.* **9** (2), 237 (1965).
- On compilation of international skeleton tables of thermodynamic properties of gas widely used in engineering, *Teplofiz. Vysok. Temper.* **3** (3), 492 (1965).
- D. I. POLISHCHUK, The Fourth Scientific Conference on Evaporation, Combustion and Gasdynamics of Dispersed Systems, *Teplofiz. Vysok. Temper.* **3** (3), 493 (1965).

## THERMODYNAMICS

- V. E. ALEMASOV and A. F. DREGALIN, Calculation of thermodynamic properties of reacting working substance, *Trudy Kazansk. Aviats. In-ta.* (86), 3 (1964).

- composite solutions (up to  $-196^{\circ}\text{C}$ ), *Inzh.-Fiz. Zh.* **9** (3), 323 (1965).
- F. A. KUZNETSOV and T. P. SMIRNOVA, Thermodynamic characteristics of thin films, *Vychisl. Sistemy* (15), 39 (1965).
- V. S. LERNER, Determination of optimum operating conditions of converters, *Inzh.-Fiz. Zh.* **9** (1), 25 (1965).
- A. V. LUIKOV, Application of irreversible thermodynamics methods to heat and mass transfer, *Inzh.-Fiz. Zh.* **9** (3), 287 (1965).
- A. V. LUIKOV, Thermodynamics and heat transfer of gas-solid particles suspension, *Izv. Akad. Nauk SSSR. Ser. Fiz.-Tekhn. Nauk* (1), 54 (1965).
- O. P. MCHEDLOV-PETROSYAN and V. I. BABUSHKIN, Interrelation between the thermodynamics and kinetics of certain solid phase reactions, *Dokl. Akad. Nauk SSSR* **163** (2), 406 (1965).
- G. B. SINYAREV, Complete thermodynamic functions and their application to the calculation of equilibrium states of composite thermodynamic systems, *Izv. Vyssh. Ucheb. Zaved. Mashinost. (2)*, 99 (1965).
- A. G. TABACHNIKOV and L. S. SERDYUK, The state equation of nitrogen oxide in the range of temperatures 190–2000°K and densities 0–20 kmol/m<sup>3</sup>, *Inzh.-Fiz. Zh.* **9** (3), 332 (1965).
- A. G. TEMKIN, Determination of internal heat- and mass-transfer parameters by means of characteristic functions of irreversible thermodynamics, *Inzh.-Fiz. Zh.* **9** (3), 305 (1965).
- P. V. TSOI, Irreversible thermodynamics and derivation of simultaneous differential equations of molecular transfer, *Inzh.-Fiz. Zh.* **9** (3), 318 (1965).
- conditions of spheric symmetry, *Zh. Prikl. Mekh. Tekh. Fiz.* (2), 110 (1965).
- V. M. KAPINOS and YU. M. MATSEVITY, On the solution by the network method of a steady heat conduction problem allowing for the dependence of the heat conductivity coefficient on temperature, *Izv. Vyssh. Ucheb. Zaved. Energetika* (5), 77 (1965).
