

## ERRATUM

W. P. JONES and B. E. LAUNDER, Prediction of low-Reynolds-number phenomena with a 2-equation model of turbulence, *Int. J. Heat Mass Transfer* **15**, 301 (1972).

The constant  $c_1$  in Table 1 is assigned the value 1.55, not 1.45. The model is thus identical to that used in the earlier paper by the authors.
