

LIST OF CONTENTS

NUMBER 1

- Yehuda Taitel, Dvora Barnea and A. E. Dukler** 1 A film model for the prediction of flooding and flow reversal for gas-liquid flow in vertical tubes
- C. K. Chan and C. K. B. Lee** 11 A regime map for direct contact condensation
- M. F. Khalil and E. Rhodes** 21 Experimental investigation of bubbly lubricated externally pressurized thrust bearings
- Jörg Reimann, Harald John and Ulrich Müller** 33 Measurements of two-phase mass flow rate: a comparison of different techniques
- S. L. Lee and J. Srinivasan** 47 An LDA technique for *in situ* simultaneous velocity and size measurement of large spherical particles in a two-phase suspension flow
- John D. Sheppard, David G. Thomas and L. S. Tong** 59 Effects of flow dispersers upstream of two-phase flow monitoring instruments
- Yutaka Tsuji, Yoshinobu Morikawa and Koza Terashima** 71 Fluid-dynamic interaction between two spheres
- Brief Communication*
- D. R. H. Beattie and P. B. Whalley** 83 A simple two-phase frictional pressure drop calculation method
- 89 Erratum
- Announcement*
- 91 Two phase gas-liquid flow short course. Principles for modelling gas-liquid flow 22-26 February 1982. University of Houston, Chemical Engineering Department, Houston, Texas

NUMBER 2

- M. A. Vince and R. T. Lahey, Jr.** 93 On the development of an objective flow regime indicator
- S. L. Lee and F. Durst** 125 On the motion of particles in turbulent duct flows
- Chia-Lin Chen and Vijay K. Dhir** 147 Hydrodynamics of a bubble formed at vent pipe exit
- Y. Katto and S. Yokoya** 165 CHF of forced convection boiling in uniformly heated vertical tubes: experimental study of HP regime by the use of Refrigerant 12
- Brief Communication*
- P. Chandran** 183 An approximate method for analyzing nonequilibrium acoustic phenomena in atmospheric fog

Announcement

- 189 Bases of two-phase flow. Two-Phase Short Course, Stanford University, Department of Chemical Engineering, 9–13 August 1982

NUMBER 3

- A. S. Sangani and A. Acrivos** 193 Slow flow past periodic arrays of cylinders with application to heat transfer
- A. A. Nicol and M. J. Dempsey** 207 Condensation of wet steam on a horizontal tube with additional droplet deposition
- W. R. Martindale and R. V. Smith** 217 Separated two-phase flow in a nozzle
- M. Trela, J. Zembik and B. Durkiewicz** 227 Droplet deposition on a flat plate from an air/water turbulent mist flow
- Jan Iciek** 239 The hydrodynamics of a free liquid jet and their influence on direct contact heat transfer—I. Hydrodynamics of a free cylindrical liquid jet
- Jan Iciek** 251 The hydrodynamics of a free, liquid jet and their influence on direct contact heat transfer—II. Conditions of change of liquid outflow type through sharp inlet edged orifice
- H. A. Khater, W. B. Nicoll and G. D. Ralphy** 261 The FAST procedure for predicting transient sub-cooled two-phase flows
- S. T. Lin and L. T. Fan** 279 A simple stochastic model of two phase flow pressure drop accompanied by boiling inside circular tubes with in-line static mixers

Brief Communications

- P. J. Fryer and P. B. Whalley** 285 The effect of swirl on the liquid distribution in annular two-phase flow
- Jean-Pierre Sursock** 291 Causality violation of complex-characteristic two-phase flow equations
- Hee Cheon No** 297 On Soo's equations in multidomain multiphase fluid mechanics

Announcements

- 301 Bases of Two-Phase Flow. Two-Phase Short Course, Stanford University, Department of Chemical Engineering, 9–13 August 1982
- 304 NATO Advanced Research Workshop on Advances in Two-Phase Flow and Heat-Transfer. Munich, Federal Republic of Germany, 31 August–3 September 1982

- 304 Fluidized Bed Technology. Stanford University, Department of Chemical Engineering 16-20 August 1982
- 307 Third International Symposium on Flow Visualization. Ann Arbor, Michigan, 6-9 September 1983
- 308 Flow Visualisation Techniques, Principles and Applications. Ann Arbor, Michigan, 16-18 August 1982

NUMBER 4

- V. Kadambi** 311 Stability of annular flow in horizontal tubes
- Yutaka Tsuji and Yoshinobu Morikawa** 329 Flow pattern and pressure fluctuation in air-solid two-phase flow in a pipe at low air velocities
- A. S. Sangani and A. A. Acrivos** 343 Slow flow through a periodic array of spheres
- A. M. J. Davis** 361 Two phase Stokes flows distorted by a sphere straddling the interface
- Z. Zapryanov and E. Chervenilvanova** 393 On the flow field induced by an oscillating disk submerged in a semi-infinite viscous fluid with a surfactant surface film
- P. L. Spedding, J. J. J. Chen and Van Thanh Nguyen** 407 Pressure drop in two phase gas-liquid flow in inclined pipes
- Y. Kawase, R. A. Mashelkar and J. J. Ulbrecht** 433 Particle-liquid mass transfer in viscoelastic media

Brief Communications

- D. M. Jewett and J. G. Lawless** 439 Spouts in a bed of silica powder associated with fluidization by outgassing of adsorbed water
- Narinder K. Tutu** 443 Pressure fluctuations and flow pattern recognition in vertical two phase gas-liquid flows

Announcements

- 449 Bases of Two-Phase Flow. Two-Phase Short Course, Stanford University, Department of Chemical Engineering, 9-13 August 1982
- 452 Fluidized Bed Technology. Stanford University, Department of Chemical Engineering 16-20 August 1982
- 455 *New Patents*

NUMBER 5

- B. R. White** 459 Two-phase measurements of saltating turbulent boundary layer flow

J-P. Hullin, C. Fierfort and R. Coudol	475	Experimental study of vortex emission behind bluff obstacles in a gas liquid vertical two-phase flow
B. J. Azzopardi and P. B. Whalley	491	The effect of flow patterns on two-phase flow in a <i>T</i> junction
P. Venkateswararao, R. Semiat and A. E. Dukler	509	Flow pattern transition for gas-liquid flow in a vertical rod bundle
R. A. Moose and E. N. Ganić	525	On the calculation of wall temperatures in the post dryout heat transfer region
A. Falade	543	Arbitrary motion of an elliptic disc at a fluid interface
Paul J. Sides	553	Axisymmetric flow driven by a surface tension gradient at a mobile interface
<i>Brief Communications</i>		
J. S. Vrentas and C. M. Vrentas	559	Inertia and surface tension effects in newtonian liquid jets
J. J. J. Chen, P. F. Y. Wong and W. K. Kwan	565	Spray-bubbling transition on sieve trays
<i>Call for Papers</i>		
	569	3rd Multi-phase Flow and Heat Transfer Symposium—Workshop
<i>Announcement</i>		
	570	Two-Phase Flow

NUMBER 6

Robert H. Davis, Eric Herbolzlehmer and Andreas Acrivos	571	The sedimentation of polydisperse suspensions in vessels having inclined walls
H. P. Greenspan and M. Ungarish	587	On hindered settling of particles of different sizes
Y. C. Chung and L. G. Leal	605	An experimental study of the effective thermal conductivity of a sheared suspension of rigid spheres
R. Shail and D. K. Gooden	627	On the slow translation of a solid submerged in a fluid with a surfactant surface film—I
M. Sadatomi, Y. Sato and S. Saruwatari	641	Two-phase flow in vertical noncircular channels
Yutaka Tsuji and Yoshinobu Morikawa	657	Plug conveying of coarse particles in a horizontal pipe with secondary air injection

**John A. Trapp and
Victor H. Ransom**

669 **A choked-flow calculation criterion for non-homogeneous, nonequilibrium, two-phase flows**

Z. H. Lin

683 **Two-phase flow measurements with sharp-edged orifices**

Call for papers

695 **3rd Multi-phase Flow and Heat Transfer Symposium—Workshop, 18–20 April 1983, Miami Beach, Florida, U.S.A.**

Announcement

697 **Two Phase Gas–Liquid Flow Short Course. Principles for Modelling Gas–Liquid Flow. 28 February–4 March 1983, University of Houston, Chemical Engineering Department, Houston, Texas, U.S.A.**
