Aims and Scope

The *International Journal of Multiphase Flow* publishes theoretical, numerical and experimental investigations of multiphase flow which are of relevance and permanent interest. Topics appropriate to the journal include fluid mechanics and rheological studies of problems involving:

- Multiphase flow and heat transfer
- Cavitation phenomena
- Bubbly flows
- Slurries (such as ceramics, catalysts, filled polymers etc.)
- Suspensions
- Particle-flow interactions
- Bubble and drop dynamics
- Fluidization
- Porous media

The journal includes full papers, brief communications covering reports, current investigations and discussions of previous publications, and conference announcements.
