Symposium on Elastomers in Medicine

Donald J. Lyman, Presiding

On May 9, 1974, a special symposium on "Elastomers in Medicine" was held at the 105th Meeting of the Rubber Division, A.C.S. and the Rubber Division, C.I.C., in Toronto, Canada. This symposium was arranged to show the members of the two Rubber Divisions new uses of elastomers—in assisting the repair of the human body, as well as trends for future applications. It was also felt that this meeting would provide a good forum for the exchange of information regarding material problems in synthesis and fabrication. To this end, a panel discussion on "Current Problems and Future Trends" was held at the end of the symposium.

The enthusiastic response of the audience was gratifying to the participants, and special thanks are due to the people and organization that made this symposium possible.
