# Preface

Proceedings of the 30th International Symposium on Novelties in Textiles; Ljubljana October 25–28 1998, Slovenia.

The Department of Textiles, University of Ljubljana organizes the International Symposium on Novelties in Textiles. After 32 years and 30 successful symposiums, this event has gained an international reputation because of its scope and the participation of foreign lecturers from countries such as Austria, Great Britain, Germany, Switzerland, the United States, the Czech Republic, Hungary, Croatia, Macedonia and Yugoslavia.

Focussing on the progress in textiles made in the last years the symposium offers a rich selection of novelties in different textile areas: fibre structure, technical textiles and composites, design of woven fabrics, mechanical textile technology and finishing, and care of textiles and clothing. The papers and posters presented at the symposium are selected by an International Programme Committee. We are pleased that the International Journal of Polymeric Materials has agreed to publish these proceedings as a special issue of the journal.
