

## **Introduction**

The first meeting of the International Quantum Structures Association (IQSA) was held in Castiglioncello, Italy, on September 21–26, 1992. It was organized in collaboration with the Florence Center for the History and Philosophy of Science and sponsored by Consiglio Nazionale delle Ricerche, Istituto Nazionale di Fisica Nucleare, and the Universities of Cosenza, Lecce, and Milano.

The next two issues of the International Journal of Theoretical Physics contain the second part of the proceedings of the conference. The first part appeared in Volume 32, No. 10 of the journal.

The proceedings collect all the papers submitted by the authors and presented either by speech or by submission during the conference.
