

Introduction

This issue consists of papers presented at Quantum Structures '94, the scientific part of the second biannual assembly of the International Quantum Structures Association (IQSA), held in Prague, August 15–20, 1994. We organized the conference and edited the proceedings under the auspices of the IQSA and the Czech Technical University of Prague. The Czech Technical University provided facilities for the conference and the Czech Grant Agency (under grant GACR 0953) partially supported it.

E. Beltrametti, R. Greechie, and K.-E. Hellwig, of the IQSA Executive Committee, and J. Hamhalter, M. Navara, and J. Tkadlec, of the local Organizing Committee, provided important help with the organization of the conference and the preparation of the proceedings.
