

Erratum: Weyl, Curvature, Ricci, and Metric Tensor Symmetries¹

Ashfaque H. Bokhari,² Shahan Ahmad,² and Amjad Pervez²

We have found an error in one of the results in our paper. Our claim in Eq. (3) is not true. According to the correct version, all the Weyl tensor components in de Sitter/anti-de Sitter spacetimes are zero identically and therefore give arbitrary WCs and not 10 as claimed in our paper.
