This issue contains papers presented at the Eighth Biennial Meeting of the International Quantum Structures Association Quantum Structures'06, held in Malta, 9–14 July 2006. The conference continued the successful meetings which took place in Castiglioncello 1992, Prague 1994, Berlin 1996, Liptovsky Jan 1998, Cesenatico 2001, Vienna 2002, and Denver 2004.

It was organized by IQSA, the Mathematical Institute of the Slovak Academy of Sciences, Bratislava, and University of Malta. The meeting was dedicated to actual problems in:

- Quantum structures and their applications in mathematics.
- Quantum mechanics.
- Quantum measurements.
- Quantum computation.
- Philosophy of quantum mechanics.
- Quantum probability.
- Etc.

We thank the IQSA, the Scientific Committee, and local organizers (Prof. D. Buhagiar), as well as those who worked as referees, for their help.

At Quantum Structures'06, three IQSA awards were made for young scholars: Emmanuel Chetchuti (Malta), Gejza Jenča (Bratislava), and Teiko Heinonen (Turku).

Prof. Mirko Navara was elected as the new president of IQSA. The Ninth IQSA Meeting Quantum Structures'08 will hold in Sopot, Poland, June/July 2008.

Anatolij Dvurečenskij is a Former President of IQSA.
