

ANNOUNCEMENTS

**Second Workshop on Subsecond Thermophysics
CNR Istituto di Metrologia "G. Colonnetti"
Torino, Italy
September 20–21, 1990**

This is the second in a series of recently established workshops (the first workshop was held at the NBS in June 1988) on both experimental and theoretical aspects of thermophysical behavior of matter in the millisecond to picosecond time regimes. It will include both rapid resistive self-heating (volume) and pulse laser heating (surface) techniques. The emphasis will be on measurements at high temperatures. The workshop will consist of invited and contributed papers.

Abstracts (200–300 words) are to be submitted before February 1, 1990. The content of the abstract will be the basis for acceptance of the paper for presentation at the workshop. Papers are to be submitted by September 21, 1990. The papers will be reviewed and those accepted will be published in a Special Workshop Proceedings Issue of the *International Journal of Thermophysics*.

**12th European Conference on Thermophysical Properties
Vienna, Austria
September 24–28, 1990**

The 12th European Conference will bring together scientists and engineers in the fields of materials technology, solid state physics, ceramics,

physicochemistry, and metrology in order to present and discuss recent research and developments in thermophysical properties. The main topics of the conference are, as traditional, related to thermophysical properties, i.e., thermal conductivity and diffusivity, specific heat capacity, thermal expansion, and radiation properties of solids. In addition, this conference series will include papers on fluids also. Special emphasis will be placed on thermophysical research at high temperatures and in multiphase systems and its industrial applications.

The conference language will be English. Both oral and poster sessions are planned.
