

Announcement

THIRD WORKSHOP ON SUBSECOND THERMOPHYSICS

**Technische Universität Graz
Graz, Austria
September 17–18, 1992**

This is the third in a series of recently established workshops on both experimental and theoretical aspects of thermophysical behavior of matter in the millisecond to picosecond time regimes. It will include both rapid resistive self-heating (volume) and pulse laser heating (surface) techniques. The emphasis will be on measurements at high temperatures. The workshop will consist of invited and contributed papers.

Abstracts (200–300 words) are to be submitted before February 1, 1992. The content of the abstract will be the basis for acceptance of the paper for presentation at the workshop. Papers are to be submitted by September 18, 1992. The papers will be reviewed and those accepted will be published in a Special Workshop Proceedings Issue of the *International Journal of Thermophysics*.
