SIXTH INTERNATIONAL WORKSHOP ON SUBSECOND THERMOPHYSICS

Austrian Foundry Research Institute, Leoben, Austria

September 26–28, 2001

This will be the sixth in a series of well-established workshops on both experimental and theoretical aspects of thermophysical behavior of matter in the millisecond to picosecond time regimes. It will include rapid resistive or inductive heating (volume), pulse laser heating (surface), and levitation techniques. The emphasis will be on measurements of thermophysical properties at high temperatures. An informal workshop atmosphere has been chosen to promote exchange and cooperation among scientists and researchers from academia, research institutions, and industry with common scientific and technical interests.

The workshop will consist of invited and contributed papers. Abstracts (200–300 words) should have been submitted by January 31, 2001. The content of the abstract was the basis of acceptance for presentation at the workshop. Full-length manuscripts are to be submitted by September 28, 2001. The papers will be reviewed and those accepted will be published in a Special Issue of the *International Journal of Thermophysics*.

For further information, please contact

Dr. Erhard Kaschnitz

SIXTH ASIAN THERMOPHYSICAL PROPERTIES CONFERENCE**Gauhati University, Assam, India***October 8–11, 2001*

This will be the sixth conference in the well-established series of conferences on thermophysical properties. This conference series is formally called the Asian Thermophysical Properties Conference (ATPC) and is one of the three worldwide conferences on thermophysical properties which are regularly circulated among Europe, the United States, and Asia.

The conference will be concerned with experimental and theoretical aspects of the thermophysical properties of gases, liquids, and various solid materials. Properties include a wide range of thermodynamic and transport properties as well as other properties such as optical and interfacial properties. Emphasis will also be on industrial applications of thermophysical properties and on databases. Key dates are March 15, 2001, for abstract submission and July 15, 2001, for full paper submission. Guwahati is located in the eastern part of India and conveniently serviced by air from New Delhi.

For further information, please contact the convener of the conference:

Professor M. N. Bora
Department of Physics
