METASTABLE STATES AND FLUCTUATION PHENOMENA

Ekaterinburg, Russia

October 18–20, 2005

The Institute of Thermal Physics of the Ural Branch of the Russian Academy of Sciences will hold the 3rd Workshop “Metastable States and Fluctuation Phenomena” in Ekaterinburg on October 18–20, 2005. The aim of the workshop is to discuss new results of experimental and theoretical investigations in the area of physics of metastable phase states and nonequilibrium processes, to determine the priority lines of investigations, to establish cooperation of various scientific groups, and to promote the practical application of the obtained results.

Review lectures (up to 30 min.) and scientific communications (15 min.) will be presented at the workshop on the following topics:

- Nonequilibrium processes attendant on phase transitions
- Thermophysical properties of substances in metastable states
- Nucleation in liquids, gases, and solids
