

LITERATURE AVAILABLE

Air Filters. An illustrated bulletin describing air filters for air conditioning and ventilation. The bulletin contains specifications, engineering and performance data covering dry tube panel filters recommended for the removal of air borne impurities. DOLLINGER CORP. **L1**

Alkyd Resins. The use of benthal in the production of short and medium oil alkyd resins to control viscosity is the subject of this bulletin. Benthal acts as a molecular chain stopper for the control of viscosity without the addition of additional amounts of glycerine or pentaerythritol to phthalic anhydride. MONSANTO CHEMICAL CO. **L2**

Carbon. Booklet describes a high purity carbon as an industrial raw material. Contains technical information of interest to manufacturers and engineers who buy solid fuel or carbon for chemical manufacturing processes. PORTLAND COKE & GAS CO. **L3**

Corrosion Resistant Tanks. Folder describes the engineering services available from an engineering and manufacturing company. The company specializes in design, installation and maintenance of corrosion resistant linings and tile tanks. STEBBINS ENGINEERING AND MANUFACTURING CO. **L4**

Feed Supplement. A 16-page illustrated booklet on methionine hydroxy analogue, a poultry feed supplement. The booklet contains charts indicating increased broiler profits obtained with the product. Other information on the history, efficiency and applications of the product are included. MONSANTO CHEMICAL CO. **L5**

Food Analyses. Catalog and price of a private testing and control laboratory, presents prices of analyses and determination for various food components including vitamins. RESEARCH AND DEVELOPMENT LABORATORIES **L6**

Industrial Water Softeners. A brochure on ion exchange water softener units. Contains all necessary information for

accurate specification of water softener equipment for manufacturing and processing plants. Data on valves as well as flow sheets and chart type specifications of the available units are included. ILLINOIS WATER TREATMENT CO. **L7**

Liquid Level Control. A device for liquid level, or density control using geiger counters and a gamma ray source is described in this booklet. The device is sensitive to changes of the density of the material being controlled and can be used to determine the degree of mixing or the distribution of materials within a closed container. INSTRUMENTS INC. **L8**

Materials Handling. Catalog of a line of tanks, mixers, filters, and pumps of stainless steel construction. Specifications and drawings of the equipment are included. ALSOP ENGINEERING CORP. **L9**

Potash. An informative booklet describes latest methods of improving crop yields through the use of potash. The booklet is intended primarily for farmers and is based on agricultural research of value to farmers who want the most effective treatment for various crops. AMERICAN POTASH CO. **L10**

Pressure Cells. Utilization and specifications of a new series of high frequency pressure cells for the measurement of rapidly changing pressures up to 20,000 lb./sq. in. are presented in this illustrated bulletin. BALDWIN-LIMA-HAMILTON CORP. **L11**

Products for Process Industries. Catalog gives data on a variety of products for process industries. The products covered include: industrial insulations, industrial pipe, and packings and gaskets of caustic resisting materials. The products are made of a mineral based corrosion and heat resisting materials. JOHNS-MANVILLE **L12**

Vacuum Equipment. Illustrated catalog of equipment for high vacuum equipment including: pumps, high vacuum evaporators, and diffusion pumps. RESEARCH VACUUM SUPPLY CO. **L13**

ARE YOU USING THE READERS' INFORMATION SERVICE?

◀ In This Issue Your RIS Coupon Appears on this Page

ACS editors screen all manufacturers' product announcements and industrial literature, publishing only what is *really* new and containing valuable scientific or technical data.

You can trust the judgment of ACS editors not to clutter Readers' Information Service with items of doubtful value simply to prove "readership."

Every chemist, every chemical engineer should make certain he keeps up to date by:

- (1) Subscribing and reading those ACS publications which serve his particular field.
- (2) Examining carefully the advertising pages in ACS publications, for they contain scientific and technical data second only in importance to the editorial pages.
- (3) Building up a substantial reference file of manufacturers' literature to provide valuable information quickly.

The following ACS publications:

Journal of Agricultural and Food Chemistry
Analytical Chemistry
Chemical and Engineering News
Industrial and Engineering Chemistry

provide Readers' Information Service. Just circle the items you wish to receive, mail, and ACS service will bring what you want promptly.
