There is a discussion of: determining the extent of routine maintenance, evaluation for critical maintenance, and the establishment of a critical maintenance program. GENERAL ELECTRIC **L12**

Radioactive Compounds. A catalog of available carbon-14 labeled compounds. Categories included: acids and derivatives, alcohols and derivatives, aldehyde, amino acids, ring labeled compounds, purines and pyrimidines, and sugars. RESEARCH SPECIALTIES CO. **L13**

Stream Traps for Food Processing. Catalog discusses a line of steam traps which are claimed to vent air from processing equipment 8 times faster than ordinary steam traps. Technical data including condensate capacities, sizes, and prices are presented. V. D. ANDERSON CO. **L14**

DON'T GUESS — use RIS*

*Readers' Information Service

There's no question about it. Keeping up with new product and materials information can be a hard job for busy *Ag and Food* readers. But quick reference to recent product data is extremely helpful in the preliminary stages of selection and specification.

That's where *Readers' Information Service* can help you. It's one sure way that you can build a substantial reference file which will put the answers to many of your questions at your fingertips.

You can be sure, too, when you return the coupon, that all manufacturers' product announcements and industrial literature have been thoroughly screened by ACS editors to include only new and valuable scientific or technical data.

If you haven't already started your file of product literature, start now and circle the items on the coupon you wish to receive. Mail it and *Ag and Food* will see that you get what you want promptly.
