

LITERATURE AVAILABLE

Agricultural Ammonia. "The ABC's of NH_3 " this booklet tells the story of the 20-year growth of anhydrous ammonia in agriculture. Treated in a question and answer method, this booklet presents arguments for NH_3 use, tells how it is distributed and applied. Maps, charts, and graphs are used to illustrate the booklet. **BASTIAN-BLESSING CO. L1**

Anhydrous Ammonia Control Equipment. Catalog of a line of anhydrous ammonia control equipment. The equipment line is based on a series of valves designed for use in field storage and application tanks. **BASTIAN-BLESSING CO. L2**

Ant Control. Folder on the use of Chlordane for controlling ants in the home, garden, and lawn. The eight-page booklet gives special application procedures and a formulation chart citing the advantages of chlordane. **VELSICOL CORP. L3**

Balances. Gram-atic Balances Bulletin gives history and theory of the single pan balance. A section on the micro Gram-atic balance is included. Special purpose balances which will not fit in weighing compartments or ordinary balances are described. **FISHER SCIENTIFIC CO. L4**

Belt Conveyor. Catalog of belt conveyor components which can be purchased as packaged units for complete conveyor installation or as repairs or replacement units for existing conveyors. **STEPHEN-ADAMSON CORP. L5**

Diffusion Pumps. Catalog describes a complete line of diffusion pumps, characteristics, pumping speeds, and pressure limits of each pump are included. Operating charts as well as photographs and drawings are also included. **NATIONAL RESEARCH CORP. L6**

Disaster. Booklet designed to assist industrial plants in choosing safety and rescue equipment for use in emergencies. Separated into five sections, the booklet discusses the equipment necessary for a

rescue team, an engineering team, and a medical team. A table of equipment check chart for quick reference and a description and picture of each item of safety equipment is included. **MINE SAFETY APPLIANCES CO. L7**

Food Packaging Equipment. Bulletin describes a complete line of filling machines for the food packaging industry. Machines for filling containers, bags, or jars are illustrated and described. **STOKES AND SMITH CO. L8**

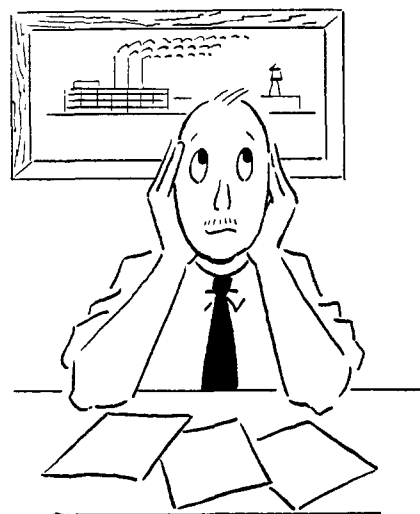

Glass Lined Tank. A glass coated steel tank, coated inside and out is described in this brochure. The tank is intended for storage of alcohol, liquid sugar, juices, pastes, oils, or syrups. **PFAUDLER CO. L9**

Indulin. Technical bulletin, on Indulin, a pine wood lignin, for removal and recovery of proteins and enzymes. There is a section of case histories in the use of the material in sugar beet press water, mold protease, malt diastase, and grain syrup. **WEST VIRGINIA PULP AND PAPER CO. L10**

Mosquito Control. Booklet entitled "Mosquito Control with Heptachlor" presents information for control of larvae and adult mosquitoes. An application table to guide in abatement projects and suggested methods of using heptachlor are presented. **VELSICOL CORP. L11**

Plate Heat Exchangers. Descriptive brochure on a line of plate heat exchangers for pasteurizing, heating, cooling or refrigeration in the dairy industry. **DELAVAL SEPARATOR CO. L12**

Surface Active Agent. Technical bulletin about Dresinate, a series of sodium and potassium salts of various processed rosins, used as an emulsifier, ster-gent, and dispersant in soluble oils. Booklet included information about these res-inates as emulsifying agents and foaming and flotation agents. Typical formula-tions are included. **HERCULES POWDER CO. L13**

DON'T GUESS — use RIS*

*Readers' Information Service

There's no question about it. Keeping up with new product and materials information can be a hard job for busy *Ag and Food* readers. But quick reference to recent product data is extremely helpful in the preliminary stages of selection and specification.

That's where *Readers' Information Service* can help you. It's one sure way that you can build a substantial reference file which will put the answers to many of your questions at your fingertips.

You can be sure, too, when you return the coupon, that all manufacturers' product announcements and industrial literature have been thoroughly screened by ACS editors to include only new and valuable scientific or technical data.

If you haven't already started your file of product literature, start now and circle the items you wish to receive on the coupon. Mail it and *Ag and Food* will see that you get what you want promptly.
