

## DON'T GUESS — use RIS\*

\*Readers' Information Service

There's no question about it. Keeping up with new product and materials information can be a hard job for busy *Ag and Food* readers. But quick reference to recent product data is extremely helpful in the preliminary stages of selection and specification.

That's where *Readers' Information Service* can help you. It's one sure way that you can build a substantial reference file which will put the answers to many of your questions at your fingertips.

You can be sure, too, when you return the coupon, that all manufacturers' product announcements and industrial literature have been thoroughly screened by ACS editors to include only new and valuable scientific or technical data.

If you haven't already started your file of product literature, start now and circle the items you wish to receive on the coupon. Mail it and *Ag and Food* will see that you get what you want promptly.

## LITERATURE AVAILABLE

**Animal, Vegetable Oils.** Bulletin catalogs industrial oil and fatty acid products. Included are detailed specifications and suggested usage on products of animal, vegetable, and marine sources including: oleic acids, red oils, stearic acids, glycerines, hydrogenated and sulfonated products; tallow, lard oils, and stearines. SWIFT & Co. **L1**

**Ammonia Application.** A complete line of field applying equipment for anhydrous ammonia is covered in this catalog. KBH CORP. **L2**

**Butyl Carbitol Acetate.** Technical bulletin on butyl carbitol acetate includes information on physical properties, specifications, shipping data, and applications. This solvent is used in the formulation of nitrocellulose and synthetic resin coatings, and as an extractant for the separation of alcohols and ketones. UNION CARBIDE CORP. **L3**

**Centrifugal Pumps.** Eight-page bulletin on a line of rubber lined centrifugal pumps. Besides giving detailed specifications and describing the design features which, the manufacturer claims, offer superior performance, this bulletin includes performance curves for the various models. INDUSTRIAL FILTER & PUMP MANUFACTURING CO. **L4**

**Colored Light Measurement.** Process control through quantitative light measurements or color comparison is described and illustrated in this data sheet. Technical details and specifications of a computing flicker photometer and associated instrumentation are discussed. MINNEAPOLIS-HONEYWELL REGULATOR CO. **L5**

**Defluorinated Phosphate.** Advantages of a defluorinated phosphate as a mineral supplement for animal feeds are described in this brochure. Research findings in which defluorinated phosphate was compared with other forms of phosphate for feed supplementation are discussed. SMITH DOUGLAS CO. **L6**

**Formulator's Manual.** New edition of the formulator's manual contains formulations suggestions for many of the newer pesticides as well as the established ones and other useful emulsification data. EMULSOL CORP. **L7**

**German, Russian Translations.** Translations of patent applications and research reports from Germany and Russia containing data on inorganic chemicals. Bulletin contains brief abstract of the translated material, divided into 6 sections: sulfur and sulfur compounds, silicon compounds, per-compounds, phosphorus compounds, metals and metal compounds, and miscellaneous. RESEARCH INFORMATION SERVICE **L8**

**Pesticide Emulsifiers.** Booklet describes in detail the advantages of a line of agricultural emulsifiers for the formulation of liquid pesticides. Contains a selector chart listing almost 300 solvent toxicant combinations and the emulsifier best suited for each. NOPCO CHEMICAL CO. **L9**

**Quick Connect Instruments.** Bulletin describes the "quick connect Tel-O-Set" miniature recorder and controller. A description of the instruments and their operation is included, and specifications are given. MINNEAPOLIS-HONEYWELL REGULATOR CO. **L10**

**Surface Active Agent.** Technical bulletin covers specifications of a fatty acid condensate surface active agent. Suggested applications include dispersing, emulsifying, or thickening of insecticidal or agricultural sprays. MONA INDUSTRIES, INC. **L11**

**Tank Weighing.** Instrumentation data sheet describes the use of Baldwin load cells in conjunction with electronic instruments for tank bin and hopper weighing. Design considerations and tips on instrument selection are included. MINNEAPOLIS-HONEYWELL REGULATOR CO. **L12**

**Vitamin E in Chicken Nutrition.** Annotated bibliography on vitamin E in chicken nutrition deals with material from 1929 to the present. Covers such items as sources of vitamin E in poultry feeds, requirements and symptoms of deficiency in the chicken, and influence of vitamin E intake on stability of poultry meat and fat. Distillation Products Industries Division, EASTMAN KODAK CO. **L13**
