THINGS TO COME

In keeping with AG&FOOD policies of providing basic information through research papers and interpretation of current development, issues of the next three months will present discussions of:

- ▶ A Survey of Economic and Technical Developments in the Fertilizer Industry
- Fertilizer Sales and Farm Income
- Liquid Fertilizer Manufacture
- Surface Active Agents in Fertilizers
- Antibiotics in Plant Disease Control
- Mechanism of Action of Pesticides
- Pesticides Toxicity Studies
- Grain Fumigants
- Rice Milling Studies
- Nutrients in Crops
- Amino Acids and Proteins in Nutrition
- Antioxidants for Fats

These and many other contributions to basic science and practiced technology will put the present into perspective and outline the future in Agricultural and Food Chemistry.
