

# Literature Available . . .

**Activated Carbon.** Folder describes company's activated carbon from coconut shell for use in solvent recovery, gas mask manufacture, air and gas purification, catalyst carriers, adsorption fractionation, selective absorption, chromatographic separation. GIRDLER Co. **L1**

**Analytical, Industrial Ovens.** Four-page bulletin describes conditioning ovens, sample drying ovens, and Silicone rubber curing ovens. NATIONAL APPLIANCE Co. **L2**

**Argon Use and Production.** Catalog sheet describes production and use of argon, which company says should not be overlooked by producers of nitrogen and ammonia as method of improving efficiency of low temperature separation operations. BLAW-KNOX Co. **L3**

**Balances.** Bulletin describes new models of Harvard trip balances. OHAUS SCALE CORP. **L4**

**Chemical Resistance of Plastics.** List of nearly 400 chemicals showing compatibility or noncompatibility with four types of polyethylene and polyvinyl chloride. AMERICAN AGILE CORP. **L5**

**Continuous Feeding of Phosphoric.** Time consuming problem of cleaning gypsum from phosphoric acid feeding equipment in the continuous production of triple superphosphate said to be minimized through use of company's system, which is described in 12-page reprint. Included are diagrams, technical data, and installation photographs. OMEGA MACHINE Co. **L6**

**Flavors and Seasonings.** Reference book and catalog contains 68 pages of basic flavor and seasoning information, including formulas, tables, and a reference chart for quick determination of the type of flavor to use for a large range of products. Book divided by tab sheets into 14 sections, each of which is tailored to a particular industry. DODGE & OL-COTT, INC. **L7**

**Granular Pesticides.** Four pages devoted to granular pesticides in general and granular pesticide control of corn borer in particular. Specialized field application rigs for these materials are shown and described. MINERALS & CHEMICAL CORP. **L8**

**Granulating Equipment.** Line of company's equipment for granulating, mixing, and drying industrial materials described in eight-page bulletin with specifications. F. J. STOKES MACHINE Co. **L9**

**Odor Control.** Use of Alamask odor control chemicals in rendering operations described in six-page bulletin. RHODIA, INC. **L10**

**Pesticide Safety.** Wallet-size folder gives information on antidotes for agricultural chemicals and a list of approved safety equipment. UNITED-HECKATHORN **L11**

**Photometer.** Dual photomultiplier light-scattering photometer recently announced described in 20-page bulletin. Used in investigating kinetics of aggregation and disaggregation of proteins caused by added reagents, enzymatic changes, or immunological reactions, as

well as other phases of biochemistry. PHOENIX PRECISION INSTRUMENT Co. **L12**

**Pump.** Bulletin explains hydraulic pressure exchange pump for pumping abrasive and corrosive muds, slurries, and solutions. New design eliminates plungers and packing with consequently lower maintenance cost and minimized down time, says manufacturer. MANTON-GAULIN MFG. Co. **L13**

**Scales.** Information on company's recently introduced line of Floaxial cabinet dial scales which make it possible for weighman to utilize drop weights and still read total net weight at tip of dial indicator. FAIRBANKS, MORSE & Co. **L14**

**Seamless Cans.** Three-color, four-page bulletin describes variety of seamless metal cans for pharmaceutical, laboratory, production line, and packaging use. Capacities range from 1/2 oz. to 16 oz. GEORGE D. ELLIS & SONS, INC. **L15**

**Solid Separation.** Sixteen-page catalog describes line of thickeners, clarifiers, and agitators for use in processing operations requiring separation of solids from a liquid. Applications and construction details are discussed, and a formula is provided for determining tank diameters of thickeners for any given set of data. HARDINGE Co., INC. **L16**

**Solvent Recovery.** Ten-page review of solvent and air recovery by means of activated charcoal from standpoint of economy, safety, pollution elimination, lower inventory, product improvement, efficiency, and improved working conditions. BARNEBY-CHENEY Co. **L17**

**Soviet Periodical Translations.** Information sheet on cover-to-cover translations into English to be made of Russian scientific periodicals beginning with July 1956 issues. Fields include biochemistry, agriculture, and chemistry. CONSULTANTS BUREAU **L18**

**Spectrographic Supplies.** Catalog and price list of special pure materials, carbon and graphite rods and powders, preformed electrodes, photographic plates, films, and processing chemicals, and texts and reference books available from company. JARRELL-ASH Co. **L19**

**Spectrophotometer Flow Chart.** Depicts accessories used with Beckman DU spectrophotometer, including attachments, thermospaces, and common spare parts arranged to show their interrelationships. WILL CORP. **L20**

**Stilbestrol Feeding.** Newsletter summarizes recent research on use of diethylstilbestrol as additive for cattle feed. ELI LILLY & Co. **L21**

**Termite Control.** Four-page booklet tells how termites can be controlled with dieldrin. Includes history of pests, how to detect them, and how pest control operators control them with dieldrin. SHELL CHEMICAL CORP. **L22**

**Weedkiller.** Sixteen-page booklet with color photographs Randox herbicides (diallylacetamide) for preemergence treatment of corn and soybeans against foxtail and other annual grasses. Gives cost estimates, application details and precautions. MONSANTO CHEMICAL Co. **L23**
