## White Named President Of Allied's Nitrogen Division

Jacob White has been named president of the Nitrogen Division of Allied Chemical, succeeding Hugo Riemer, who recently resigned. He has been vice president of the Nitrogen Division since 1953, having been with Allied since 1921.

## Shifts at Monsanto

W. R. Bone has been promoted from technical service representative in Monsanto's inorganic chemicals division to product sales manager of agricultural chemicals. Stewart D. Daniels has been named technical service manager for agricultural chemicals for the division. He was in the sales department. Newly appointed associate product sales manager for direct application liquids in the division is John C. Docter, who was in the sales department. Leroy Donald has been named chief agronomist for the division at St. Louis, after having served in the sales department since 1956. J. R. Glatthaar has been transferred from Chicago, where he was division's district sales manager, to St. Louis, where he is to be assistant director of agricultural chemicals sales for the inorganic division. R. W. Goldthwaite, who has been assistant sales director since 1956, has become associate product sales manager for fertilizer manufacturers. The former assistant director of agricultural sales, B. M. Machen, has been appointed district sales manager of a newly established office in New York. M. F. Walsh, who was product sales manager for agricultural sales for the inorganic division, becomes district sales manager for industrial chemicals at Chicago.

John L. Hammer, Jr., has left Monsanto's organic chemicals division to become assistant to the president of Mississippi Lime Co., Alton, Ill. Succeeding him as director of marketing for the organic division is Arthur P. Kroeger, who was associate director of marketing.

Jacob White, new president of the Nitrogen Division of Allied Chemical, has been elected to the board of the National Plant Food Institute for a term that will expire in June 1961. Also elected for the same term are: J. H. Epting, Epting Distributing Co., Leesville, S. C.; G. R. Monkhouse, Shell Chemical; R. E. Bennett, Farm Fertilizers, Inc., Omaha, Neb.; S. L. Nevins, Olin Mathieson; W. H. Wilson, Virginia-Carolina; R. C.

Wells, National Potash; Rene A. Jones, Anaconda Co.; J. D. Stewart, Jr., Federal Chemical; W. E. Shelburne, Armour Fertilizer Works; E. N. Carvel, Valliant Fertilizer Co., Laurel, Del.; and Wallace B. Hicks, Wilson & Toomer Fertilizer Co., Jacksonville, Fla.

Thomas N. J. Koerwer has been named advertising sales manager for AGRICULTURAL AND FOOD CHEMISTRY. Formerly assistant advertising sales manager, he succeeds David B. Hoopes, who has been promoted to assistant advertising sales manager for the American Chemical Society publications.

Arlan Woltemath has joined National Plant Food Institute as a district representative. He will report to NPF's regional office in Chicago and will work out of Kansas City. Woltemath was formerly district agronomist for Spencer Chemical.

W. G. Reed, recently retired head of USDA's Pesticide Regulation Section, has received USDA's Superior Service Award, for "promulgating, implementing, and administering the Insecticide, Fungicide, and Rodenticide Act of 1947 and coordinating the requirements of that statute with the Pesticide Chemicals Amendment to the Food, Drug, and Cosmetic Act." Also receiving a Superior Service Award was Joseph A. Beaulieu, agriculturist with the Plant Pest Control Division's district office in Gloversville, N. Y., and specialist in gypsy moth control. He was cited "for unusual initiative and leadership in directing a plant pest control operation requiring strict adherence to safety and accuracy and for his ability to effectively and rapidly train inexperienced workers." USDA also gave a Unit Award to the Insects Affecting Man and Animals Research Branch, ARS, at Orlando, Fla., and Beltsville, Md., "for planning and conducting a program for the synthesis and evaluation of insect repellents, resulting in the development of an outstanding all-purpose repellent for use on human skin and clothing."

C. F. Lane has been named acid superintendent for the southern division of American Agricultural Chemical Co.

Maurice H. Lockwood, until recently a vice president of International Minerals & Chemical, received the University of Connecticut Alumni Recognition Award recently in ceremonies at Storrs. He graduated from the university in 1921.

Stuart H. Bear has been promoted

from sales manager to manager of the Niagara Chemical Division of Food Machinery. He joined Niagara 27 years ago as an assistant territory salesman in western New York.

William P. Boyer has succeeded Russell L. Haden, Jr., as head of Virginia-Carolina's chemical division. Haden has returned to Dewey & Almy, which he left to join V-C in December 1957. Boyer was formerly director of research and development for V-C.

J. H. Zwemer has left Smith-Douglass to rejoin Monsanto Chemical as assistant director of the development department in the inorganic division.

Ove F. Jensen, sales specialist on Uramon ammonia liquors for the fertilizer industry, will retire July 31 after 25 years with Du Pont. Philip B. Turner will succeed Mr. Jensen in Indianapolis. James W. Lewis will succeed Dr. Turner in the Northeast.

John W. Keays has joined the Crag agricultural chemicals department of Union Carbide to assist in market development of Sevin insecticide. He was formerly at Boyce Thompson.

Albert J. Puschin has been named executive vice president of Nitroform Agricultural Chemical Co. A chemical engineer, he has been engaged in consulting work. At Nitroform his duties will include sales, production, and administration. Raymond E. Harman, a county agent for 30 years, has joined Nitroform as mid-Atlantic section agronomist. Charles M. Mruk, who joined Nitroform last September, has been named sectional agronomist for the Northeast.

William F. Geddes, head of the University of Minnesota's department of agricultural biochemistry, has received the Nicholas Appert medal and \$1000 award from the Institute of Food Technologists. He was cited for "outstanding achievement in food technology."

Fred G. Arnold has been appointed by Potash Co. of America as sales representative for North and South Carolina and Virginia, with headquarters in Raleigh, N. C.

James R. Costello has been promoted from process chemist to supervisor of the process development group for Chemagro's Kansas City plant. Lawrence W. Berglund, who was design engineer, has become supervisor of the engineering group; and Robert A. Mohr, who was process engineer, has been promoted to supervisor of the pilot plant.

Ray S. Dunham, University of Minnesota weed control specialist, has retired after 37 years at the university.
