American Chemical Society DIRECTORY OF GRADUATE RESEARCH

Faculties, Publications, and Doctoral
Theses in Departments of Chemistry,
Biochemistry, and Chemical Engineer-
ing at United States Universities

INCLUDES:

- ▶ All institutions which offer Ph.D. in chemistry, biochemistry, or chemical engineering
- ▶ Instructional staff of each institution
- ▶ Research reported at each institution for past two years
- ▶ Alphabetical index of 2,878 faculty members and their affiliation; alphabetical index of 236 schools

The ACS Directory of Graduate Research is the only U. S. Directory of its kind. The 3rd edition, prepared by the ACS Committee on Professional Training, now includes all schools and departments (with five exceptions where data were received too late for inclusion) concerned primarily with chemistry, biochemistry, or chemical engineering, known to offer the Ph.D. degree.

The Directory is an excellent indication not only of research reported during the last two years at these institutions but also of research done prior to that time. Each faculty member reports publications for 1956-57; where these have not totaled 10 papers, some articles prior to 1956 are reported. This volume fully describes the breadth of research interest of each member of the instructional staff.

Because of the indexing system, access to information is straightforward and easy—the work of a moment to find the listing you need. Invaluable to anyone interested in academic or industrial scientific research and to those responsible for counseling students about graduate research.
