SYNTHESIS OF BIOACTIVE COMPOUNDS. A STRUCTURE-ACTIVITY STUDY OF ARYL TERPENES AS JUVENILE HORMONE MIMICS

In this article by George P. Nilles, Matthew J. Zabik, Richard V. Connin, and Robert D. Schuetz [*J. Agric. Food Chem.* **24**(4), 699 (1976)] the following corrections should be made. Equation 2 (p 704) has a term ($T_a - 2.00$). This should read ($T_a - 1.00$). In Table III (p 705) the W values for mimics 12 and 13 are maximum values (footnote *b*). The minimum value of W for both 12 and 13 is 6.29 Å. On p 707, paragraph 2, line 4, refer to eq 4, not Figure 4. On p 707, paragraph 3, line 4 should read "Mimics 17, 18, 19, and 21. . .", not "17, 18, 19, and 28".
