FLAVONOL GLYCOSIDES FROM THE SEED COAT OF A NEW MANTECA-TYPE DRY BEAN (*PHASEOLUS VULGARIS* L.), by Clifford W. Beninger, George L. Hosfield,* and Muraleedharan G. Nair. *J. Agric. Food Chem.* **1998**, *46*, 2906.

In the Abstract, compound **1** should be identified as 5,7,4'-trihydroxyflavonol 3-*O*- β -D-glucopyranoside. Under Results and Discussion, the C4' assignments were omitted; they are for kaempferol 3-*O*- β -D-glucopyranoside C4' = 159.92 ppm and for kaempferol 3-*O*- β -D-glucopyranoside-(2 \rightarrow 1)- β -D-xylopyranoside C4' = 159.95 ppm. Under Literature Cited, the volume number for Kooiman (1931) is 8.
