

## EDITORIAL

### Changes in the Wind...

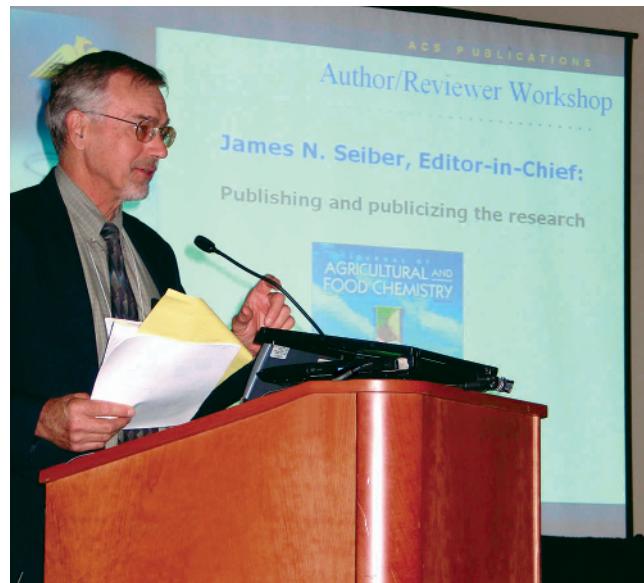

As *JAFC* begins 2006, and its 54th volume, a number of changes are in progress. Our Editorial Advisory Board and Associate Editors, the ACS Publications Division, and many of our authors and reviewers have contributed ideas and opinions that we take into consideration when making significant changes in the *Journal's* scope, policy, and guidelines.

First, beginning with this issue, *JAFC* will accept for review **only manuscripts submitted via the *Journal's* manuscript submission Website**. Exceptions will be made only for authors who are unable to submit manuscripts in this way because of lack of access to the Internet. (All such non-Web submissions require prior permission from the editor.) In this day and age, we would not expect this to be the case except in highly unusual circumstances. *JAFC*, along with all other ACS journals, and in fact most journals worldwide, conducts all aspects of manuscript processing (reviewing, revisions) electronically. This begins with a high quality, consistently formatted, electronic version of the manuscript, prepared by the authors. Electronic processing has numerous advantages, not the least of which is reducing processing time. (*JAFC* processing time from receipt to printed publication now averages under 25 weeks, compared to over 30 weeks just 5 years ago. The time from receipt to posting of the article on the Web is even more impressive—just 22 weeks for 2005.) Electronic processing is also more cost-effective, an important consideration as manuscript submissions increase. At this writing, manuscript submission to *JAFC* for 2005 is expected to be about 3360 manuscripts, an increase of about 25% over submissions in 2004.

Also, *JAFC* and all other ACS journals will be paying closer attention to **manuscript length**. *JAFC* article length has crept upward from 5.9 published pages 5 years ago to 6.2 pages in 2005. This has significant impact on production costs. Authors are asked to use the Supporting Information option for lengthy data sets, compilation of spectra, etc. An exception to the page length limit can be made when the authors and Editor agree that the topic should command more pages to provide coverage and quality.

In terms of scope, *JAFC* will return, unreviewed, manuscripts reporting **bioactivity for extracts and other mixtures** for which the individual components responsible for the activity have not been chemically characterized. Exceptions can be made when the bioactivity is of such significance that the report cannot wait for full characterization, but this will rest upon justification by the authors and the content of the manuscript.

The **manuscript cover letter** must include not only such pertinent information as the manuscript title, corresponding author name and contact information (and submitter's contact

**Figure 1.** *JAFC* Editor Jim Seiber at the ACS Cycle of Excellence Author/Reviewer Workshop held at the ACS Fall National Meeting in Washington, DC. Associate Editors Willis Wheeler and John Finley also made presentations at this workshop. A future author/reviewer workshop is planned for the Spring 2006 ACS National Meeting in Atlanta, GA.

information, if different from the corresponding author's), a list of graphics to be published in color, and the names and contact information for four potential reviewers but also a **clear statement of the significance of the manuscript to agricultural and food chemistry**, including its unique contributions to science, in a few words or sentences. Manuscripts submitted without a cover letter, or with a cover letter not addressing the manuscript's significance and originality, will be held until a cover letter is provided with the essential information.

Because *JAFC* is first and foremost a chemistry/biochemistry journal, the **content of all manuscripts must include chemistry/biochemistry as a major component**. A large proportion of submissions fall on the side of not having enough chemistry or biochemistry to fit in the scope of the *Journal*. Manuscripts that report sensory, toxicological, pharmacological, nutritional, or pesticidal activity without significant accompanying chemistry should be submitted to a journal in one of the fields mentioned. Structures, detailed mechanisms, metabolic/metabolomic schemes, analytical methods, and graphs showing changes in chemical composition with time are particularly appropriate for *JAFC*. Of course, they can be accompanied with relevant biological

**Figure 2.** JAFC Editor, Associate Editors, Editorial Advisory Board, Editorial Office Staff, and Division Representatives at the Advisory Board Meeting held August 30, 2005, at the ACS Fall National Meeting in Washington, DC. Front row, left to right: Karen Parker, John Finley, Elizabeth Waters, Marshall Phillips, Jim Seiber, Russell Molyneux, Willis Wheeler, Peter Schieberle, Loreen Kleinschmidt, Sharon Martini. Middle row, left to right: Chi-Tang Ho, Keith Cadwallader, Ella Robinson, Andrew Waterhouse, Sam K. C. Chang, Heijia Wheeler, Sara Risch, Cynthia Mussinan, Robert McGorrin, Harold Pattee. Back row, left to right: Sharon Shoemaker, Carl Frey, Michael Morello, Rodney Bennett, Eric Block, Anne Desjardins, Michael Tunick, Allan Felsot, Thomas Hofmann, Nancy Ragsdale, Ann Lemley.

activity data, but the chemistry/biochemistry components must be significant and prominent.

We continue to have a **large need for new reviewers** to add to our roster of reviewers. We now typically contact eight or more individuals to find the minimum (two or three) needed to review a manuscript. In 2006 we will be working with ACS staff to refresh and replenish our reviewer roster. Please fill out a survey for yourself, but also suggest two or three or more others who may be new to the field or simply overlooked in the past as a reviewer. Also, when you are unable to review, please consider having a postdoctoral or graduate student or junior colleague review the manuscript under your guidance. This can be a good mentoring experience (plus the *Journal* benefits with a well-considered review, and possibly a new reviewer for its ranks!). A first-of-its-kind reviewer and **author workshop** was held at the 2005 Fall ACS meeting as part of the ACS Cycle of Excellence in Scientific Publishing (**Figure 1**). A second workshop is planned for the Spring 2006 ACS meeting in Atlanta, GA, under the cosponsorship of the AGFD Division and Publications Division and leadership of Associate Editor Willis Wheeler.

Special thanks to our **yeomen reviewers** in 2005. They include Chi-Tang Ho, Thomas Hofmann, Eric Decker, Sam K. C. Chang, Si-Yin Chung, John Johnston, Delano James, Ann Hagerman, Taka Shibamoto, Werner Gorsch, Wieslaw Oleszek, Ronald Prior, Liangli Yu, Reinhold Carle, and Cristina Garcia-Viguera. A complete listing of reviewers for 2005 is also published in this issue. These scientists are performing a vital pro-bono service to the quality of *JAFC*.

*JAFC's* 2004 **ISI Impact Factor** increased to 2.327, up from 2.102 in 2003. This is the third year in a row that *JAFC's* Impact Factor has increased significantly. In addition to the ISI Impact Factor (which is for items cited), another measure of interest in an article is how many Web views it receives. There is a link at the *JAFC* Website listing the most accessed articles during the periods January–June and July–September 2005. In addition, *JAFC's* published articles continue to be picked up and cited in the popular press, including newspapers, news magazines, and both specialty and general interest periodicals.

We thank the **JAFC Advisory Board** for its support (**Figure 2**) was taken of Board members at the Advisory Board meeting held during the Fall ACS National Meeting in Washington, DC); our Associate Editors Marshall Phillips, Willis Wheeler, Russell Molyneux, John Finley, Peter Schieberle, and Elizabeth Waters, and the staff of each of our editorial offices; the staff of the ACS Publications division, all of whom keep the “presses rolling” (now it’s the Web, more than the press!) for *JAFC* and the other 31 ACS journals. And thanks also to the *JAFC* authors who continue to help the *Journal* pursue excellence in scientific publishing.

Best wishes for a most enjoyable, successful, and peaceful 2006!

Jim Seiber  
Editor  
JF052913O

## List of Reviewers—2005

The Editor and Associate Editors gratefully acknowledge the following scientists for reviewing manuscripts during 2005. Many of these individuals reviewed several manuscripts. We thank all of the reviewers for their contributions of time and talent.

Note: This list reflects reviews received between November 11, 2004, and November 9, 2005.
