

EDITORIAL

International Dimensions of the *Journal of Agricultural and Food Chemistry*

A striking development in the past 10 years or so is the growth of quality scientific research programs in countries that have historically been overshadowed by the North American, Western European, Australian, and Japanese research communities. Even more than most U.S.-based scientific journals, *JAFAC* has experienced a rapid growth in manuscripts received and published from countries other than the United States and Canada. In 2007, 84 % of all manuscripts received by the *JAFAC* office in California were from outside North America. By July 2007, China had emerged as the leader (258 manuscripts submitted January–June 2007), Spain was second with 232, and the United States occupied third place (227). The top 10 submitting countries listed in **Table 1** show major percentage gains by China (311% increase from 2003 to 2006), Brazil (139%), Taiwan (117%), India (89%), and Italy (68%), with several other countries posting gains as well. During this period, submissions from the United States increased by 25%.

Whereas submissions are up, dramatically in some cases, the acceptance rates for manuscripts from some contributors, for example, China, Brazil, and India, still lag behind those of the United States considerably. The average acceptance rate for just those three countries was 21% in 2006, versus 61% for the United States and 43% for all manuscripts submitted to *JAFAC*. Many factors can lead to a manuscript's rejection, but a large proportion of rejected manuscripts from China, Brazil, and India were judged to fall outside the scope of the *Journal's* purview. To improve understanding of the *Journal's* scope and other criteria, and thus to improve acceptance rate, *JAFAC* has taken a number of steps to reach authors and prospective authors. These include participation in the ACS Publications Division author workshops at ACS National Meetings and representing the *Journal* at scientific and professional meetings outside the

ACS and in many cases outside the United States. In the past two years (2006 and 2007), the *Journal* has been represented by the Editor and/or Associate Editors and Advisory Board members, along with ACS Publications Division personnel, at several major non-U.S. national and international meetings, and more are planned for the future. Recent examples include the 2007 Annual Meeting of the Brazilian Chemical Society (Aguas do Lindoia, Sao Paulo), the 11th IUPAC International Congress of Pesticide Chemistry (Kobe, Japan), and the 7th International Conference of Food Science and Technology (Wuxi, People's Republic of China). Although it is perhaps too soon to see the results of these efforts, some encouraging signs have developed. For example, the acceptance rate for manuscripts from China was around 24% in 2006 and 2007, compared with 13% in 2005. In addition to podium presentations that include descriptions of *JAFAC*, scientific conferences and workshops and associated visits to nearby campuses provide opportunities for discussing the scope of *JAFAC*, its expectations of a strong content of chemistry/biochemistry, the criterion of novelty, how the review process works, and answers to questions. In these face-to-face meetings we emphasize that *JAFAC* is primarily a chemistry journal, and we are looking for chemical/biochemical content—compound characterization, mechanisms (of biosynthesis, processing-induced changes, and metabolism), and novel analytical methods—along with relevance to food/feed, nutrition, diet, health, agricultural productivity, and environmental quality. Please let us know as you become aware of major scientific/professional meetings involving agricultural and food chemistry in your geographical areas, so we can plan to have *JAFAC* represented even more widely, both within and outside North America.

The *Journal's* international presence has also been significantly enhanced by the appointment of two new Associate Editors outside North America—Dr. Zhen-Yu Chen, Chinese University of Hong Kong, People's Republic of China, and Dr. Francisco Tomás-Barberán, Centro de Edafología y Biología Aplicada del Segura, CSIC, Murcia, Spain. Our eight Associate Editors are located on four continents—North America, Europe, Asia, and Australia (**Figure 1**). Fourteen of the 43 *JAFAC* Editorial Advisory Board members reside outside North America. We welcome two new appointees to the Editorial Advisory Board for 2008, Dr. Philippe Jeandet from France and Dr. Robert I. Krieger from the United States.

As the total number of manuscripts, and the number submitted from outside North America, continues to increase (we expect to exceed 4000 in 2007), our need for reviewers (total numbers

Table 1. Number of Manuscripts Submitted, Top 10 Submitting Countries, 2006 versus 2003, and January–June 2007

country	2003	2006	Jan–June 2007
United States	418	524	227
China	103	423	258
Spain	297	368	232
Italy	159	267	135
Taiwan	109	237	111
Japan	189	203	85
India	84	159	68
France	107	156	90
Brazil	59	141	53
Germany	76	101	55

Figure 1. Journal of Agricultural and Food Chemistry Associate Editors.

Figure 2. Editor Jim Seiber congratulates Advisory Board Member Chi-Tang Ho, the top reviewer for *JAFCh* for each of the past 5 years.

and with geographical and disciplinary representation) increases as well. During 2007, more than 4300 reviewers submitted reviews, and approximately 68% of them reside outside North America. This statistic will increase in coming years as more manuscripts from outside North America are published, and the authors are asked to consider joining the *Journal's* ranks of reviewers.

Special thanks were expressed to our top reviewers, those who have returned the most reviews during the previous 12 month period, at the 2007 *JAFCh* Advisory Board meeting. These top reviewers included Chi Tang Ho, Yoshinori Mine, George Rizzi, Francesco Bonomi, Keith Cadwallader, Werner Grosch, Ann Hagerman, Francisco Hidalgo, Antonio Jimenez-Escrig, Takayuki Shibamoto, and Xianli Wu. Dr. Ho submitted 15 reviews during the 12 month period before our meeting and

has been our top reviewer every year for the past 5 years (Figure 2)! We recognize and thank all of our reviewers for 2007 on the pages following this editorial.

We look forward to 2008 with much anticipation. The ACS Division most closely allied with the *Journal*, the Division of Agricultural and Food Chemistry (AGFD), will celebrate its 100th anniversary in 2008, during the Fall National Meeting in Philadelphia, PA. Congratulations to AGFD! We continue to see accelerating interest, reflected in more manuscripts in *JAFCh* and other journals, in the bioactive constituents of foods, bioenergy, biofuel and biobased products, and biotechnology areas (please see the January 2007 editorial, New Dimensions of Agricultural and Food Chemistry, *J. Agric. Food Chem.* **2007**, *55*, 1–4). The number of national/international meetings in the bioenergy area would indicate that we can expect major growth

in this field for several years to come. As a reflection of the growth of bioenergy/biofuels interest and to add emphasis on the chemistry/biochemistry nature of *JAF*C, there are some changes in our subject category titles beginning with this issue. "Biobased Products" has become "Biofuels and Bioproducts Chemistry", "Biotechnology" is now "Chemical Aspects of Biotechnology/Molecular Biology", and "Safety/Toxicology" has been split into "Chemical Aspects of Food Safety" and "Toxicology in Agriculture and Food".

*JAF*C encourages more submission of symposia manuscripts of broad interest in 2008. Shortly, *JAF*C will publish papers from the symposium "Chemistry and Toxicology of Acrylamide", organized by Drs. Mendel Friedman and Donald

Mottram, presented at the Fall 2007 National Meeting of the ACS in Boston, MA, in a single issue. *JAF*C also encourages submission of Reviews and Perspectives in 2008. Please get in touch if you have ideas for symposia, review, and perspective manuscripts that could fit in *JAF*C.

Special thanks to our authors, reviewers, Associate Editors, Editorial Assistants, Advisory Board members, and staff of the ACS Publications Division for your support in 2007, and my personal best wishes to all for a most successful 2008.

James N. Seiber
Editor

LIST OF REVIEWERS 2007

The Editor and Associate Editors gratefully acknowledge the following scientists for reviewing manuscripts during 2007. Many of these individuals reviewed several manuscripts. We thank all of the reviewers for their contributions of time and talent.

Note: This list reflects reviews received between October 27, 2006, and October 30, 2007.
