

## EDITORIAL

### Diversifying *JAF*C

The *Journal of Agricultural and Food Chemistry* has long been known for its content of peer-reviewed primary research manuscripts that report for the first time novel content in agricultural and food chemistry. The need for a primary publication outlet, and

a measure of *JAF*C's success with this model, are reflected in a significant growth over the past 10 years in the number of manuscripts submitted and published (1252 and 898, respectively, in 1998, expected to be 4000 and 1600, respectively, in 2008 when

**Figure 1.** *JAF*C continues to be well received by authors and reviewers internationally. Pictures from Asia: (top left) *JAF*C Advisory Board Member Chi-Tang Ho (right) presents a souvenir to Associate Editor Zhen-Yu Chen (left) after Dr. Chen's talk, "Preparing a manuscript for the *Journal of Agricultural and Food Chemistry*", given at the Symposium of Nanotechnology and Safety for Food in Taipei, Taiwan, November 12, 2008; (top right) Food Science graduate students wearing their ACS "I Review" tee shirts at an Academic Forum held at Jiangnan University in Wuxi, People's Republic of China, October 23, 2008; (bottom left) Prof. Jian Chen, president of Jiangnan University (center), with Jim Seiber, *JAF*C (left), and Howard Zhang, Eastern Regional Research Center, USDA-ARS (right), October 23, 2008; (bottom right) Prof. Xuhong Qian, President of East China University of Science and Technology (right) with Jim Seiber (left) during his visit on October 19, 2008.

**Figure 2.** *JAFc* in South America: (Top) ACS President Bruce E. Bursten (second from right) attended the Congress of the Latin American Federation of Chemical Associations (FLAQ 2008), along with his counterparts representing chemical societies from many nations of the western hemisphere. Bradley Miller of ACS co-organized the symposium on Biofuels and Biobased Products held in connection with FLAQ in San Juan, Puerto Rico, July 29, 2008. (Inset) Tony Prieto (University of Puerto Rico, Rio Piedras) (left) with *JAFc* Editor Jim Seiber (right).

the December 2008 statistics are in), in the ISI Impact Factor (2.53 in 2007 vs 1.42 in 1998), and the international authorship and readership (73.9% of all manuscripts published in 2007 were from outside North America).

We continue to be gratified by the surge in manuscript submissions from Asia and South America, where *JAFc* continues to be well received by authors and reviewers (**Figures 1 and 2**) and by a continuing lively association with the ACS Agricultural and Food Chemistry (AGFD) and Agrochemical Divisions (AGRO) (**Figures 3 and 4**).

However, there is also a clear need for content that integrates over the broader areas within the *Journal's* scope and that which can go in depth in specific categories. This is perhaps more important now than ever as the number of journals and published pages has proliferated to the point where even dedicated readers can only skim the surface of this mountain of information. Because of this need for integration and in-depth coverage, and as a result of a strategic planning meeting held at ACS headquarters in early 2008, *JAFc* made a push for high-quality manuscripts in the categories **Perspectives**, **Reviews**, and **topical clusters** exemplified by symposia held at national/international meetings. Associate Editor Willis Wheeler (**Figure 5**) spearheaded the effort by personally contacting prospective authors (including Advisory Board members and Editor/As-

sociate Editors) who the planning group felt could contribute significant manuscripts.

**Reviews** allow authors to “summarize information in a field in which the literature is scattered” or “to provide a new approach or stimulate further research” according to the Author Guidelines. Reviews can result from a literature search for a grant proposal or for an expert panel report, or as a summary of an area of science by a scholar in the field, or just because it “needs to be done”. In 2008, *JAFc* published 11 reviews, versus 4 in 2007 (**Table 1**), running the gamut from analytical methods to health-promoting bioactive constituents of food to genetically modified insect-protected crops.

**Perspectives** give authors more latitude to explore needs and opportunities in agricultural and food chemistry in a less technical and comprehensive format than a review. For example, what is the low-down on biofuels and how can agricultural chemists contribute, or what are the preferred methods for evaluating naturally occurring antioxidants, and how should claims for health benefits of grapes be regarded? In 2008 *JAFc* published six Perspectives versus 2 in 2007 (**Table 2**).

**Symposia or Topical Collections** represent a series of manuscripts reporting original research around a single subject area. These usually result from symposia, although clusters can

**Figure 3.** JAFAC participates in AGFD and AGRO Division activities at the ACS 236th National Meeting in Philadelphia, PA, August 17–21, 2008. (Top left) Several AGFD members meet at the AGFD Division table during the 100th Anniversary Symposium: (left to right) Bhimu Patil, AGFD Chair; Fereidoon Shahidi, Awards Committee; Deepthi Weerasinghe, Chair Elect; Michael Tunick, Secretary. A collection of papers presented at this symposium will be published in *JAFAC* in 2009. (Top right) Division of Agrochemicals (AGRO) Chair Laura McConnell and Vice Chair John Johnston urge meeting attendees to become *JAFAC* reviewers at the AGRO table. (Bottom left) The 2008 Sterling Hendricks awardee Fergus Clydesdale poses with Mike Tunick, USDA-ARS, Eastern Regional Research Center. The Sterling Hendricks award is sponsored by USDA's Agricultural Research Service and cosponsored by the ACS AGFD and AGRO Divisions. (Bottom right) Noted author and awardee Harold McGee talks with Donna Nelson and Sara Risch at the reception for the Grady–Stack Award for Interpreting Chemistry to the Public, held at the Trump Tower Skyline Center. Dr. McGee often refers to research published in *JAFAC* in his newspaper column, *The Curious Cook*.

**Figure 4.** Dr. David M. Soderlund, recipient of the International Award for Research in Agrochemicals, during the symposium held in his honor at the ACS 236th National Meeting in Philadelphia, PA, August 19, 2008. This award is cosponsored by BASF Corporation and DuPont Crop Protection and presented by the ACS Agrochemicals Division.

**Figure 5.** Associate Editor Willis Wheeler and Editorial Assistant Heijia Wheeler at the ACS 236th National Meeting in Philadelphia, PA, August 17–21, 2008.

**Table 1.** Eleven Reviews Were Published in *JAFAC* during 2008 (Vol. 56), versus 4 in 2007**Fluorescence Spectroscopy: A Rapid Tool for Analyzing Dairy Products**

Charlotte Møller Andersen and Grith Mortensen (pp 720–729)

**Mycotoxins in Ethanol Coproducts: Modeling Economic Impacts on the Livestock Industry and Management Strategies**

Felicia Wu and Gary P. Munkvold (pp 3900–3911)

**Challenges for Research on Polyphenols from Foods in Alzheimer's Disease: Bioavailability, Metabolism, and Cellular and Molecular Mechanisms**

Manjeet Singh, Madeleine Arseneault, Thomas Sanderson, Ven Murthy, and Charles Ramassamy (pp 4855–4873)

**Recent Advances in the Understanding of Egg Allergens: Basic, Industrial, and Clinical Perspectives**

Yoshinori Mine and Marie Yang (pp 4874–4900)

**Update on Uses and Properties of Citrus Flavonoids: New Findings in Anticancer, Cardiovascular, and Anti-inflammatory Activity**

O. Benavente-García and J. Castillo (pp 6185–6205)

**Biobeds for Environmental Protection from Pesticide Use—A Review**

María del Pilar Castillo, Lennart Torstensson, and John Stenström (pp 6206–6219)

**A Review of Analytical Methods for the Identification and Characterization of Nano Delivery Systems in Food**

Dion M. A. M. Luykx, Ruud J. B. Peters, Saskia M. van Ruth, and Hans Bouwmeester (pp 8231–8247)

**Cholesterol-Lowering Nutraceuticals and Functional Foods**

Zhen-Yu Chen, Rui Jiao, and Ka Ying Ma (pp 8761–8773)

**Nutritional Benefit of Olive Oil: The Biological Effects of Hydroxytyrosol and Its Arylating Quinone Adducts**

David G. Cornwell and Jiyan Ma (pp 8774–8786)

**Applications of High-Resolution Solid-State NMR Spectroscopy in Food Science**

Fabio Bertocchi and Maurizio Paci (pp 9317–9327)

**Processing and Storage Effects on Orange Juice Aroma: A Review**

Pilar Ruiz Perez-Cacho and Russell Rouseff (pp 9785–9796)

**Biocatalysis for the Production of Industrial Products and Functional Foods from Rice and Other Agricultural Produce**

Casimir C. Akoh, Shu-Wei Chang, Guan-Chiun Lee, and Jei-Fu Shaw (pp 10445–10451)

**Table 2.** Six Perspectives Were Published in *JAFAC* during 2008 (vs Two in 2007)**Biofuels: Thinking Clearly about the Issues**

Bruce Dale (pp 3885–3891)

**Agricultural Chemistry and Bioenergy**

William J. Orts, Kevin M. Holtman, and James N. Seiber (pp 3892–3899)

**Healthy Foods Research: A Publication Strategy To Maximize Impact**

James N. Seiber and Loreen A. Kleinschmidt (pp 4283–4285)

**How To Standardize the Multiplicity of Methods To Evaluate Natural Antioxidants**

Edwin N. Frankel and John W. Finley (pp 4901–4908)

**Grapes and Human Health: A Perspective**

John M. Pezzuto (pp 6777–6784)

**Natural Product Chemistry Meets Genetics: When Is a Genotype a Chemotype?**

Anne E. Desjardins (pp 7587–7592)

**Table 3.** Four Symposia/Topical Clusters Were Published in *JAFAC* in 2008 (vs Two in 2007)**International Berry Health Benefits Symposium**

organized by Navindra Seeram, 14 articles (Issue 3)

**Spotlight Issue: Biofuels and Biobased Products**

organized by James N. Seiber, 7 articles (Issue 11)

**Chemistry and Toxicology of Acrylamide**

organized by Donald Mottram and Mendel Friedman, 28 articles (Issue 15)

**The HEALTHGRAIN Diversity Screen—Bioactive Components of Wheat and Other Cereals**

organized by Peter Shewry, 11 articles (Issue 21)

**Figure 6.** *JAFAC* Associate Editors and Editorial Assistants at the *JAFAC* Advisory Board Meeting held August 20, 2008, during the ACS 236th National Meeting in Philadelphia, PA. Front row, left to right: Marshall Phillips, Fe Molyneux, John Finley, Willis Wheeler, Heijia Wheeler, Elizabeth Waters. Back row, left to right: Zhen-Yu Chen, Loreen Kleinschmidt, Russell Molyneux, Jim Seiber, Peter Schieberle, Sharon Martini.

also originate from coordinated research by groups of investigators under a program project such as the European Framework projects. In 2008, *JAF*C published four such clusters, versus two in 2007, including Spotlight on Biofuels and Biobased Products, Chemistry and Toxicology of Acrylamide, International Berry Health Benefits Symposium, and the HEALTH-GRAIN Diversity Screen (**Table 3**). Issues carrying most of these were designated as Spotlight Issues, with a banner or header on the cover, and/or special mention at the *JAF*C Website (We try hard to capture reader attention!).

We are going to continue this trend in 2009. It is a good boost for impact for authors as well as for the *Journal*, and we feel that readers at all levels benefit because the stimulation provided by reviews, perspectives, and topical clusters can significantly advance research. If you have an idea for a review, perspective, or topical cluster, please contact one of the Associate Editors or me with an outline of your idea, and we will work with you in evaluating its potential for success as a *JAF*C manuscript (or series of manuscripts in the case of topical clusters).

*JAF*C has had a good year, for which we express appreciation to many. Our authors (over 7000 authors/coauthors in 2008) provide substance; our reviewers (4791 in 2008) ensure quality; our Advisory Board (42 in 2008) provide guidance; and our Associate Editors and Editorial Assistants (**Figure 6**) and ACS Publications Division staff (thank heavens for them!) continue to put it all together in the content delivered to the Web and printed pages (and do so in an exceptionally timely manner). I also thank my fellow strategic planning committee members (John Finley, Andrew Waterhouse, Willis Wheeler, Sean Abell, and Susan King) for helping to steer the path forward in 2008. And special thanks go to Associate Editor Willis Wheeler, who is wrapping up 10 years of service as Associate Editor.

Best wishes to all for a most successful 2009!

James Seiber  
Editor

## LIST OF REVIEWERS 2008

The Editor and Associate Editors gratefully acknowledge the following scientists for reviewing manuscripts during 2008. Many of these individuals reviewed several manuscripts. We thank all of the reviewers for their contributions of time and talent.

Note: This list reflects reviews received between October 31, 2007, and November 13, 2008.
