Foreword	xi
Preface	xiii
Introduction of LeRoy Eyring, Frank H. Spedding awardee	xiv
Spedding Award Lecture	
Exploring the black oxide of praseodymium. L. Eyring (Tempe, AZ, USA)	1
Lanthanides in Biochemistry and Medical Diagnostics	
The use of gadolinium and dysprosium chelate complexes as contrast agents for magnetic resonance imaging A.D. Watson (Sunnyvale, CA, USA)	14
Gd ³⁺ chelates of interest in magnetic resonance imaging (MRI): studies using ¹⁷ O NMR and EPR at several magnetic fields D. Hugh Powell, G. González, V. Tissières, K. Micskei (Lausanne, Switzerland), E. Brücher (Debrecen, Hungary), L. Helm and A.E. Merbach (Lausanne, Switzerland)	20
Molecular sieve based MRI contrast agents. K.J. Balkus, Jr. and I. Bresinska (Richardson, TX, USA)	25
Synthesis, characterization and luminescent properties of Eu ^{III} and Tb ^{III} fluorescent chelates used as label in medical immunoassays H.H. Shi and Y.S. Yang (Guangzhou, China)	29
Optical Spectroscopic Probes of Electronic Structure and Dynamics in Lanthanide and Actinide Systems	
Application of energy upconversion spectroscopy to novel laser and phosphor design. N.J. Cockroft (Los Alamos, NM, USA)	33
f-State luminescence of trivalent lanthanide and actinide ions in solution. J.V. Beitz (Argonne, IL, USA)	41
Magnetic circular dichroism for generating crystal wave functions L. Fluyt, P. Verhoeven, H. Lambaerts, K. Binnemans and C. Görller-Walrand (Heverlee, Belgium)	51
Chirality-dependent excited-state quenching of Eu(dpa) ₃ ³⁻ and Tb(dpa) ₃ ³⁻ luminophores by diastereomeric structures of Δ-[Co(<i>trans</i> -1,2-cyclohexanediamine) ₃] ³⁺ in aqueous solution J.P. Bolender, D.H. Metcalf and F.S. Richardson (Charlottesville, VA, USA)	55
The determination of chiroptical dissymmetry factors and electric- <i>vs.</i> magnetic-dipole transition amplitude ratios from circularly polarized excitation and emission measurements on racemic Eu(dpa) ₃ ³⁻ in aqueous solution. D.H. Metcalf and F.S. Richardson (Charlottesville, VA, USA)	59
Time-resolved chiroptical luminescence spectra of UO ₂ ²⁺ in cubic Na[UO ₂ (CH ₃ COO) ₃] crystals: evidence for circular dichroic self-absorption. D.H. Metcalf, D.M. Moran and F.S. Richardson (Charlottesville, VA, USA)	62
Comparative study of the crystal field effects in rare earth oxynitrates. J. Hölsä (Turku, Finland), M. Karppinen (Espoo, Finland) and E. Kestilä (Turku, Finland)	65
Electronic energy level structure of Tb ³⁺ in LiYF ₄ G.K. Liu, W.T. Carnall (Argonne, IL, USA), R.P. Jones, R.L. Cone (Bozeman, MT, USA) and J. Huang (Eau Claire, WI, USA)	69
Comparative correlation crystal field analysis of Er ³⁺ (4f ¹¹) in garnet hosts A. Renuka Devi, C.K. Jayasankar (Kurnool, India) and M.F. Reid (Christchurch, New Zealand)	74
The relationship between perturbation theory and direct calculations of rare earth transition intensities M.F. Reid (Christchurch, New Zealand), G.W. Burdick (Collegedale, TN, USA) and H.J. Kooy (Hong Kong, Hong Kong)	78
