NOTICES

Symposium on Electrochemical Reaction Engineering

The Society of Chemical Industry and Institution of Chemical Engineers are holding a symposium at Southampton on 18–20 April 1979. The subjects covered will include: the effect of a local cell environment on the specificity of reaction, the effect of mode of operation (e.g. batch, continuous, recycle) on the specificity of reaction, and the interaction between electrochemical cells and associated unit processes.

Further details may be obtained from: Dr R. E. W. Jansson, Chemistry Department, The University, Southampton SO9 5NH, UK.

Third Euchem Conference on Solid State Chemistry and Electrochemistry

This conference will be held at the Bavarian Conference Centre, D-8207 Endorf, near Rosenheim, West Germany from 30 April to 3 May 1979. The theme of the conference will be the development of existing and novel battery systems. Further contributions are invited.

Further details may be obtained from: Dr W. Fritsche, Gesellschaft Deutscher Chemiker, PO Box 900 440, D-6000, Frankfurt/Main 90, West Germany.

6th Yugoslav Symposium of Electrochemistry

This Symposium will be held in Dubrovnik, Yugoslavia, on 4–9 June 1979. The theme of the Symposium will be all aspects of electrochemistry.

Further details may be obtained from: Dr I. Tabakovic, Faculty of Technology, University of Banja Luka, 78 000 Banja Luka, Danka Mitrova 63, Yugoslavia.

Advanced Instrumental Methods in Electrode Kinetics

The 5th Southampton Summer School will be held in the University on 8–13 July 1979 on the above subject. As on previous occasions, the course will contain both advanced lecture material and extensive practical periods.

Further details may be obtained from: Dr D. Pletcher, Department of Chemistry, The University, Southampton SO9 5NH, UK.

9th International Symposium on the Reactivity of Solids

This Symposium will be held in Cracow, Poland, on 1–6 September 1980. Topics covered will include: defects and transport in solids, chemical vapour deposition, the role of surface phenomena in the reactivity of solids, formation and transformations of non-crystalline solids, new aspects of phase transformations, and solid state reactions in the development of novel technologies.

Further details may be obtained from: Dr J. Nowotny, Institute of Catalysis and Surface Chemistry, Polish Academy of Sciences, ul. Niezapominajek, 30-239 Kraków, Poland.

AES International Symposium on Pulse Plating

The American Electroplaters' Society International Symposium on Pulse Plating will be held in Boston, Mass., USA on 19 and 20 April 1979. Topics discussed will include: precious metal plating, tin-lead plating, brass plating, chromium, nickel or copper plating, anodizing, electropolishing and other applications of pulsed-current waveforms.

Further details may be obtained from: F. H. Faber, Faber Public Relations, 5001 W. 80th Street Minneapolis 55437, USA.
