

NOTICE

The Corrosion Division of the Electrochemical Society is sponsoring or co-sponsoring the following symposia at the forthcoming national meetings of the Electrochemical Society:

Minneapolis, Minnesota 10–15 May, 1981

Anodic oxidation
Transport under electrical and thermal gradients
Nonaqueous electrolytes
Vibrational spectroscopy in electrochemistry
General session

Denver, Colorado 11–16 October, 1981

Impedance and pulse methods for investigation of corrosion processes
Corrosion in metal matrix composites
Corrosion in solar energy systems
Corrosion in batteries and fuel cells
New techniques for study of electrode processes
General session

Montreal, Canada 9–14 May, 1982

Corrosion problems in nuclear and fusion technologies

Electrochemical techniques for high temperature corrosion studies

Materials and new processing technologies for photovoltaics

Advanced aqueous electrolytes for energy systems

Molten carbonate fuel-cell technology

Energy conservation in electrochemical processes

General session
