

Editorial

This issue of the Journal of Applied Electrochemistry contains eight papers which were originally given at the meeting on Material Problems and Material Sciences in Electrochemical Engineering Practice held at Maastricht, The Netherlands, September 17–18th, 1987. This meeting was organised by the Working Party on Electrochemical Engineering of the European Federation of Chemical Engineering and was held in parallel with the 38th Meeting of the International Society of Electrochemistry. The editor is grateful to Professor Hartmut Wendt for his valued help in the procurement and preparation of these papers. A foreword to these papers appears on page 552.
