

## EDITORIAL

This issue of the Journal of Applied Electrochemistry is devoted to selected papers from the 3rd International Workshop on Electrodiffusion Diagnostics of Flows which was held in Dourdan, near Paris, in May 1993. This meeting followed two earlier workshops held in Prague (1990) and Moscow/Dubna (1991). Papers from the Prague meeting were published in the December 1991 issue of this Journal (Volume 21 Issue 12).

The Dourdan meeting of 1993 was held under the auspices of Centre National de la Recherche Scientifique (CNRS), the French Ministry of Recherche et Espace, and the International Society of Electrochemistry (ISE).

I am particularly indebted to Bernard Tribollet and Claude Deslouis for help with the procurement and processing of papers for this issue.
