

Index to Volume 31 (2001)

The subject index has been organized into topics for easy reference.

Subject Index 2001

Corrosion and prevention

- Influence of 2,5-bis(4-dimethylaminophenyl)-1,3,4-thiadiazole on corrosion inhibition of mild steel in acidic media 41
Influence of heat treatment on the corrosion of high speed steel 65
An investigation of some Schiff bases as corrosion inhibitors for austenitic chromium–nickel steel in H₂SO₄ 79
The inhibiting effect of quaternary phosphine on Ni–P alloys in 1 M H₂SO₄ 85
Dynamic characteristics of ship impressed current cathodic protection systems 105
Influence of alloying additives on corrosion and hydrogen permeation through commercial aluminium in alkaline solution 115
The effects of 20 kHz and 500 kHz ultrasound on the corrosion of zinc precoated steels in [Cl⁻] [SO₄²⁻] [HCO₃⁻] [H₂O₂] electrolytes 213
Pitting corrosion of copper in sulphate solutions: inhibitive effect of different triazole derivative inhibitors 223
Influence of iron addition on the microstructure and the electrochemical corrosion of Al–Zn–Mg alloys 293
Corrosion inhibition of mild steel in acidic medium using 2-amino thiophenol and 2-cyanomethyl benzothiazole 429
Corrosion behaviour of Ti–4Al–4V alloy in nitric, phosphoric and sulfuric acid solutions at room temperature 455
An electrochemical study of the formation of Benzotriazole surface films on Copper, Zinc and a Copper–Zinc alloy 509
Corrosion of mild steel in low conductive media simulating natural waters 537
Comparative study of the effect of oxygen and oxygen/ozone mixtures on the electrochemical behaviour of different metals 591
Effects of Zn and Pb as alloying elements on the electrochemical behaviour of brass in borate solutions 663
Electrochemical dissolution of tin in methanesulphonic acid solutions 693
An electrochemical investigation of the suppression of silver dissolution in aqueous cyanide by 2-mercaptobenzothiazole 703
Role of chromate, molybdate and tungstate anions on the inhibition of aluminium in chloride solutions 711
In situ micro-Raman spectroscopy to investigate pitting corrosion product of 1024 mild steel in phosphate and bicarbonate solutions containing chloride and sulfate ions 913
Electrochemical and surface properties of aluminium in citric acid solutions 961
Inhibitory mechanism of low-carbon steel corrosion by mimosa tannin in sulphuric acid solutions 973
Corrosion behaviour of some stainless steels in chlorinated Gulf seawater 1009
Corrosion of Au–Pd–In alloy in simulated physiological solutions 1079
Effect of silicon alloying addition on the corrosion behaviour of aluminium in some aqueous media 1103
The role of chloride ions and pH in the corrosion and pitting of Al–Si alloys 1131
A new technique for online visualization of the electrode surface under electrochemical corrosion processes 1195
A study of the adsorption properties of commercial carbon dioxide corrosion inhibitor formulations 1221
Effect of benzotriazole on the corrosion of alpha brass in sulfide polluted salt water 1261
Electrochemical behaviour of cadmium in NaOH solution 1333
AC impedance spectroscopy as a technique for investigating corrosion of iron in hot flowing Bayer liquors 1373

Effluent and water treatment

- Adsorption and electrosorption at high-area carbon-felt electrodes for waste-water purification: Systems evaluation with inorganic, S-containing anions 257
Electrodeionization 1: Migration of nickel ions absorbed in a rigid, macroporous cation-exchange resin 523
Effect of catalyst type on the kinetics of the photoelectrochemical disinfection of water inoculated with *E. coli* 623
Hydrogen peroxide production by water electrolysis: Application to disinfection 877
Electrodeionization 2: The migration of nickel ions absorbed in a flexible ion-exchange resin 1071
Electrochemical reduction of nitrate in weakly alkaline solutions 1185
Antioxidant effects of reduced water produced by electrolysis of sodium chloride solutions 1307
Electrochemical monitoring of water remediation by metallic iron 1339

Electrocatalysis and kinetics

- Influence of surfactants on the electroreduction of oxygen to hydrogen peroxide in acid and alkaline electrolytes 233
H₂ and H₂/CO oxidation mechanism on Pt/C, Ru/C and Pt–Ru/C electrocatalysts 325
Platinum-based alloys as oxygen reduction catalysts for solid–polymer–electrolyte direct methanol fuel cells 373
Investigation of ternary catalysts for methanol electrooxidation 379
Electrooxidation of cyanide on cobalt oxide anodes 469
Electrocatalytic activity of platinum modified polypyrrole films for the methanol oxidation reaction 501
Optimization of hydrogen evolving activity on nickel–phosphorus deposits using experimental strategies 565
Electrocatalytic oxidation of hydrogen peroxide by poly(Ni^{II}teta) modified electrodes 585
Electrochemical characterization of Ni–P and Ni–Co–P amorphous alloy deposits obtained by electrodeposition 677
Electrodeposition of catalytically active mixed solid films of hexacyanoferrate and decavanadates 1125
Kinetics of molecular oxygen electroreduction on platinum modified by tin underpotential deposition 1293

Electrochemical engineering

- Regeneration of hexavalent chromium using a Bi-doped PbO₂ anode 165
 Theoretical and experimental studies of the dynamic behaviour of plug flow electrochemical reactors for a step change in flow rate 403
 Chlorate transport through ion-exchange membranes 421
 Reduction of metal ions in dilute solutions using a GBC-reactor. Part II: Theoretical model for the hydrogen oxidation in a gas diffusion electrode at relatively low current densities 629
 Steady-state mass transport at stationary discs under divergent laminar radial flow conditions 671
 Vapour-liquid slip in a parallel-plate electrochemical fluorination reactor 863

Electrochemical synthesis and production

- Electrochemical properties of oligothiénylene-oligosilanylene block copolymers: Influences of block sizes 175
 Electrochemical reduction of dichlorodifluoromethane on silver and lead electrodes 207
 Inhibiting effect of oxidized zirconium on parasitic cathodic reactions in the sodium chlorate process. Part I: Hypochlorite reduction 307
 Electrochemical behaviour of iron-complexes in presence of competitive ligands: A strategy for optimization of current density 363
 Anodic oxidation of nitric oxide on Au/Nafion®: kinetics and mass transfer 437
 Kinetic study of 3,6-dimethylthieno[3,2-*b*]thiophene electropolymerisation 839
 Industrial polypyrrole electrodeposition on zinc-electroplated steel 905
 Influence of aromatic reactants and products involved in the two stage electrochemical oxidation on the voltammetric behaviour of Ce(IV)/Ce(III) redox couple 979
 Surface-modified electrodes for NADH oxidation in oxidoreductase-catalysed synthesis 1095
 Stability of perchlorate ions in acid medium: Interaction with nickel and copper metals 1171
 Hydrogen concentration in water from an Alkali-Ion-water electrolyzer having a platinum-electroplated titanium electrode 1301
 Novel preparation and electrochemical study of the dithiocarbamate polymer/thiuram disulfide redox system 1321
 Galvanostatic oxidation of formaldehyde-methanol solutions on Ti/Ru_{0.3}Ti_{0.7}O₂ electrodes using a filter-press cell 1351
 Electrochemical chromic acid regeneration process with fuel cell electrode assistance. Part I: Removal of contaminants 1381
 Chromic acid regeneration process with fuel cell electrode assistance. Part II: Electrochemical characterization, material compatibility and energy consumption 1389

Electrochemical machining

- Two-dimensional two-phase numerical model for tool design in electrochemical machining 145
 The use of a segmented tool for the analysis of electrochemical machining 1213

Energy conversion, batteries and fuel cells

- Modelling electrochemical impedance data for semi bipolar lead acid batteries 1
 An investigation of scale-up on the response of the direct methanol fuel cell under variable load conditions 13
 Structural and electrochemical characteristics of Li_{4/3}Ti_{5/3}O₄ as an anode material for rechargeable lithium batteries 73
 Electrical characteristics of 18650 Li-ion cells at low temperatures 99
 Use of gaseous Cr species to diagnose surface and bulk process for O₂ reduction in solid oxide fuel cells 181
 Performance of a novel Ni/Nb cathode material for molten carbonate fuel cells (MCFC) 201
 Electrochemical studies of the nickel electrode with cobalt modification 245
 Development and operation of a 150 W air-feed direct methanol fuel cell stack 275
 The role of particle size in cathode optimization in alkaline primary batteries 341
 Effects of the diffusion layer characteristics on the performance of polymer electrolyte fuel cell electrodes 449
 Cyclic voltammetric study of zinc and zinc oxide electrodes in 5.3 M KOH 655
 Superactivation of metal electrode surfaces and its relevance to CO_{ads} oxidation at fuel cell anodes 729
 Methanol-resistant cathodic oxygen reduction catalysts for methanol fuel cells 739
 Abnormal infrared effects and electrocatalytic properties of nanometer scale thin film of PtRu alloys for CO adsorption and oxidation 749
 Formation of intermediates during methanol oxidation: A quantitative DEMS study 759
 Mechanistic aspects of methanol oxidation on platinum-based electrocatalysts 767
 Phosphoric acid doped polybenzimidazole membranes: Physicochemical characterization and fuel cell applications 773
 Experimental results on the direct electrochemical oxidation of methanol in PEM fuel cells 781
 Electrooxidation of acetals for direct hydrocarbon fuel cell applications 787
 Synthesis and characterization of carbon-supported Pt-Ru-WO 793
 Electrocatalytic oxidation of aliphatic alcohols: Application to the direct alcohol fuel cell (DAFC) 799
 Composite electrocatalysts for anodic methanol and methanol-reformate oxidation 811
 Electrochemical and gas evolution characteristics of direct methanol fuel cells with stainless steel mesh flow beds 823
 Electrochemical supercapacitors based on industrial carbon blacks in aqueous H₂SO₄ 845
 Diagnosis of specific surface area in fuel cell air electrodes 883
 Electrodes modified by electrodeposition of CoTAA complexes as selective oxygen cathodes in a direct methanol fuel cell 945
 Extending the life of maintenance-free lead/acid batteries by etching of grids in sodium hydroxide 953
 Iron(III) tetramethoxyphenylporphyrin (FeTMPP-Cl) as electrocatalyst for oxygen reduction in direct methanol fuel cells 1025
 Comparative study on electrochemical techniques for determination of hydrogen diffusion coefficients in metal hydride electrodes 1033
 Study of the performance of secondary alkaline pasted zinc electrodes 1049
 Synthesis and electrochemical characterization of a new Se-doped spinel material for lithium secondary batteries 1149
 IrO₂-deposited Pt electrocatalysts for utilized regenerative polymer electrolyte fuel cells 1179
 Suppression of the $\alpha \rightarrow \beta$ -nickel hydroxide transformation in concentrated alkali: Role of dissolved cations 1315
 Raman spectroscopy studies of concentrated vanadium redox battery positive electrolytes 1327

Instruments, methods

- 1,1'-Bis(11-mercaptoundecyl)ferrocene for potentiometric sensing of H^+ ion in sulfuric acid media simulating lead acid battery electrolyte 921
Reliability and accuracy of measured overpotential in a three-electrode fuel cell system 1163

Mass transfer and hydrodynamics

- On minimum mass transfer at a sintered metal electrode 193
Mass transport characterization of a novel gas sparged photoelectrochemical reactor 267
Entrance effect on mass transfer in a parallel plate electrochemical reactor 833

Materials electrochemistry

- Synthesis and characterization of polypyrrole/TiO₂ composites on mild steel 49
Electropolymerized poly(2-vinylpyridine) coatings as ion-exchange polymer modified electrodes 281
Electrocatalytic properties of Ti/TiO₂ electrodes prepared by the Pechini method 319
Electrodeposition and characterization of Zn–Ni alloys as sublayers for epoxy coating deposition 355
An electrochemical and XPS study of Ag–Pb binary alloys incorporated in Nafion[®] coatings 481
Electrochemical properties of composites based on nanocrystalline anatase (TiO₂) and copper compounds (CuBr, CuO) 495
Fluorine-free binders for carbon black based electrochemical supercapacitors 517
Electrodeposition of functionalized pyrrole (*N*-[3-(dimethylpyridyl-2-yl)aminopropyl], *N*-(3-aminopropyl), *N*-(3-acetamidopropyl) and *N*-(2-cyanoethyl)) on stainless steel gauze for membrane preparation 547
Role of ethylamines on the electrochemical behaviour of Fe–Ni alloy films 1227
Electrical conduction behaviour of Ba²⁺ and Mg²⁺ doped LaGaO₃ perovskite oxide 1243
Preparation and analysis of films on aluminium by high voltage anodization in phosphoric acid and sodium tungstate solution 1267
Anodic oxidation behaviour of Al–Ti alloys in acidic media 1273

Metal and alloy deposition and dissolution

- A study of hardness and grain size in pulse current electroforming of nickel using different shaped waveforms 25
Recovery of activated nickel from residues for electroforming applications 35
Surface plasma functionalization of polycarbonate: Application to electroless nickel and copper plating 57
Pulse plating of cobalt–iron–copper alloys 137
Effects of copper and anions on zinc–nickel anomalous codeposition in plating and electrowinning 313
Tin–cobalt electrodeposition from sulfate–gluconate baths 349
Electrochemistry of the SUCOPLATE[®] electroplating bath for the deposition of a Cu–Zn–Sn alloy. Part I: Commercial bath 387
Electrochemistry of the SUCOPLATE[®] electroplating bath for the deposition of Cu–Zn–Sn alloy. Part II: Influence of the concentration of bath components 395
A modified Hull cell and its application to the electrodeposition of zinc 411
Composite electrodeposition of ultrafine γ -alumina particles in nickel matrices. Part I: Citrate and chloride electrolytes 461
Cathodic film formation during chromium electrolysis on low-carbon steel using short duration current steps 531
Effect of particles on polarization during electrocodeposition using a rotating cylinder electrode 559
Effect of pyridine and its derivatives on the electrodeposition of nickel from aqueous sulfate solutions. Part I: Current efficiency, surface morphology and crystal orientation 579
Modelling of through-hole electrodeposition. Part I: Effect of electrical migration 605
Modelling of through-hole electrodeposition. Part II: Experimental study 617
Hydrogen evolution and permeation into steel during zinc electroplating: effect of organic additives 647
Influence of polyethoxylated additives on zinc electrodeposition from acidic solutions 685
Electrochemical activation of the electroless deposition of Ni–P alloy and phase structure characterization of the deposit. Part II: Single bath system 855
Electrodeposition of La–Ni alloy films in a nonaqueous system 891
Electrodeposition and characterization of Au–Cu–Cd alloys 897
Properties and microstructure of nickel electrodeposited from a sulfamate bath containing ammonium ions 925
Characterization of electrodeposited thin layers of magnetic alloys by Mössbauer spectroscopy 935
Effect of pyridine and its derivatives on the electrodeposition of nickel from aqueous sulfate solutions. Part II: Polarization behaviour 969
A cyclic voltammetric study of ferrocyanide-thiocyanate silver electrodeposition electrolyte 1041
Kinetics of electroless silver deposition using cobalt(II)-ammonia complex compounds as reducing agents 1061
Electrodeposition of Sn and Co coatings from citrate solutions 1109
Electropolymerization of chlorinated phenols on a Pt electrode in alkaline solution Part I: A cyclic voltammetry study 1117
Electrodeposition of zinc from high acid zinc chloride solutions 1141
Electroplating and electroless plating of Ni through/onto a porous polymer in a flow cell 1203
Influence of tartaric acid on the electrodeposition of silver from binary water + dioxane AgNO₃ solutions 1251
Electrodeposition of aluminium and aluminium/platinum alloys from AlCl₃/benzyltrimethylammonium chloride room temperature ionic liquids 1345
The influence of some parameters on the surface roughness of thin copper foils using statistical analysis 1359
Electroless deposited Ni–Re–P, Ni–W–P and Ni–Re–W–P alloys 1367
Electrochemical deposition of Copper on patterned Cu/Ta(N)/SiO₂ surfaces for super filling of sub-micron features 1395

Mineral and metallurgical electrochemistry

- Effect of organic extractants on the electrocrystallization of nickel from aqueous sulphate solutions 301
Effect of Mg²⁺, Li⁺, Na⁺ and K⁺ on the electrocrystallization of nickel from aqueous sulfate solutions containing boric acid 573

- The role of zinc and sulfuric acid concentrations on zinc electrowinning from industrial sulfate based electrolyte 641
Computerized scaled cells to study the effect of additive ratios and concentrations on modulation during copper electrorefining 1017
A spectroelectrochemical investigation of the influence of sodium diisobutylidithiophosphate on silver dissolution in aqueous cyanide 1285

Molten salt electrochemistry

- Cathodic refining in molten salts: Removal of oxygen, sulfur and selenium from static and flowing molten copper 155
A bipolar electrode cell for aluminium electrorefining 871
Preparation and characterization of chromium deposits obtained from molten salts using pulsed currents 987
Anodic behaviour of carbon materials in NaCl saturated NaAlCl₄ fused electrolyte at low temperatures: A cyclic voltammetric study 997
Electrode reaction of the Np³⁺/Np couple in LiCl-KCl eutectic melts 1055
Electrochemical behaviour of copper in trimethyl-*n*-hexylammonium bis((trifluoromethyl)sulfonyl)amide, an ammonium imide-type room temperature molten salt 1089
Copper deoxidation with calcium carbide melts: electrochemical reactions 1155

Photoelectrochemistry

- Photoelectrical properties of the system ITO/poly(4,4'-diphenoxy-3'-dodecyl-2,2':5',2'-terthiophene)/Al: Effect of electrosynthesis conditions 335
A dye-sensitized nanoporous TiO₂ photoelectrochemical cell with novel gel network polymer electrolyte 445

Thermodynamics and physical properties

- Calculation of the e.m.f. of solid oxide fuel cells 93
Solid electrolyte galvanic cell under load 1235

Miscellaneous

- Stability of mercury film electrodes under the influence of high frequency(500 kHz) ultrasound 475
Electrochemical agglomeration of polystyrene latex 719
