

## Index to Volume 32 (2002)

The subject index has been organized into topics for easy reference.

### Subject Index 2002

#### *Corrosion and prevention*

- The study of aluminium corrosion in acidic solution with nontoxic inhibitors 35  
Inhibition of copper corrosion by several Schiff bases in aerated halide solutions 65  
Influence of heat transfer on anodic oxidation of aluminium 73  
Corrosion resistance of compositionally modulated Zn–Ni multilayers electrodeposited from dual baths 85  
Corrosion protection of iron by polystyrenesulfonate-doped polypyrrole films 105  
Effect of temperature on stability of adsorbed inhibitors on steel in phosphoric acid solution 149  
Tarnishing and corrosion of silver-based casting alloys in synthetic salivas of different compositions 157  
Effect of complexing agents on the electrochemical behaviour of orthopaedic stainless steel in physiological solution 311  
Investigation on inhibition of  $bfCrO_4^{2-}$  and  $bfMoO_4^{2-}$  ions on carbon steel pitting corrosion by electrochemical noise analysis 395  
Behaviour of intact and scratched phosphate coatings on zinc, zinc–nickel and mild steel in dilute sodium phosphate solution 401  
Inhibition of mild steel corrosion in the presence of fatty acid triazoles 425  
Application of substituted *N*-arylpiperroles in the corrosion protection of aluminium in hydrochloric acid 431  
An electrochemical study of the behaviour of ear piercing studs immersed in a culture medium 487  
Study of the properties of a multi-component inhibitor used for water treatment in cooling circuits 497  
Corrosion inhibition of steel in chloride-containing alkaline solutions 527  
Stability of perchlorate ions in acid medium: Interaction with zinc and aluminium 581  
Electrochemical study of thiourea and substituted thiourea adsorbates on polycrystalline platinum electrodes in aqueous sulfuric acid 611  
Influence of power ultrasound on the corrosion of aluminium and high speed steel 653  
Effect of iodide ions on corrosion inhibition of mild steel by 3,5-bis(4-methylthiophenyl)-4H-1,2,4-triazole in sulfuric acid solution 671  
Inhibition of corrosion of steel in produced water of Western Desert crude oil 775  
Electrochemical and surface analysis study of copper corrosion protection by 1-propanethiol and propyltrimethoxysilane: A comparison with 3-mercaptopropyltrimethoxysilane 783  
Microstructural and corrosion studies of Ti alloy (IMI 834) in acidic solutions 795  
An EIS study of the influence of imperfections on the corrosion behaviour of an organic coated steel system 853  
Corrosion mechanisms of steel concrete moulds in the presence of a demoulding agent 865  
The influence of different surface conditions in the corrosion process of carbon steel in alkaline sour media 905  
Copper phthalocyanine as corrosion inhibitor for ASTM A606-4 steel in 16% hydrochloric acid 915  
Defect dimension evaluation in organic coated galvanized steel by electrochemical impedance spectroscopy 921  
Influence of different anions on the behaviour of aluminium in aqueous solutions 1193  
Galvanostatic anodization of pure Al in some aqueous acid solutions Part I: Growth kinetics, composition and morphological structure of porous and barrier-type anodic alumina films 1257  
Electrochemical behaviour of thermally sprayed  $Cr_3C_2$ –NiCr coatings in 0.5 m  $H_2SO_4$  media 1287  
Electrochemical study of the chromium electrode behaviour in borate buffer solution 1341  
Electrochemical study of the adsorption and inhibiting properties of halogen derivatives of aniline on iron in sulfuric acid 1355  
Electrochemical behaviour of low carbon steel in concentrated carbonate chloride brines 1363  
Effect of heat treatment on corrosion and electrochemical behaviour of AZ91D magnesium alloy 1397  
Stability of perchlorate ions in acid medium: Interaction with iron 1403

#### *Effluent and water treatment*

- Electrodeionisation 3: The removal of nickel ions from dilute solutions 1  
Electrochemical ferrate generation for waste water treatment using cast irons with high silicon contents 57  
Gas purification by removal of atomic mercury using electrochemical cells 379  
Electrochemical treatment of dilute cyanide solutions containing zinc complexes by oxidation at carbon felt (Sigratherm) 409  
Removal of nonylphenol ethoxylates by electrochemically-generated coagulants 561  
Electrochemically assisted photocatalytic degradation of oxalic acid on particulate  $TiO_2$  film in a batch mode plate photoreactor 591  
Electrochemical water disinfection. Part III: Hypochlorite production from potable water with ultrasound assisted cathode cleaning 597  
Direct electrochemical reduction of indigo: process optimization and scale-up in a flow cell 647  
Cathodic decolorization of textile dyebaths: Tests with full scale plant 943  
Ammonium nitrate wastewater treatment by coupled membrane electrolysis and electrodialysis 969  
Chromium removal using a porous carbon felt cathode 1091  
Combined electrooxidation and assisted electrochemical coagulation of aqueous phenol wastes 1241

#### *Electrocatalysis and kinetics*

- Electrocatalytic reduction of dioxygen on hemin based carbon paste electrode 129  
Composition dependence of the oxygen-evolution reaction rate on  $Ir_xTi_{1-x}O_2$  mixed-oxide electrodes 173  
Surface characterization and photocatalytic reactivity of innovative Ti/ $TiO_2$  and Ti/Pt- $TiO_2$  mesh photoelectrodes 203

- Catalysts for oxygen reduction from heat-treated carbon-supported iron phenantroline complexes 211  
 Preparation and electrochemical characterization of Ti/Ru<sub>x</sub>Mn<sub>1-x</sub>O<sub>2</sub> electrodes 513  
 Ir-based oxide electrodes: oxygen evolution reaction from mixed solvents 735  
 A catalytic platinum–ruthenium–polyaniline electrode for methanol oxidation 825  
 An electrochemical impedance study of hydrogen evolution and absorption on Sn-modified steel electrodes 883  
 Anodically deposited manganese–molybdenum–tungsten oxide anodes for oxygen evolution in seawater electrolysis 993  
 Kinetics of hydrogen evolution on submicron size Co, Ni, Pd and Co–Ni alloy powder electrodes by d.c. polarization and a.c. impedance studies 1005  
 Oxygen reduction on silver catalysts in solutions containing various concentrations of sodium hydroxide – comparison with platinum 1131

#### *Electrochemical engineering*

- The voltage of alumina reduction cells prior to the anode effect 241  
 Potential and concentration gradients in a hybrid ion-exchange/electrodialysis cell 369  
 Influence of an electrochemically generated gas phase on pressure drop in a three-dimensional electrode and an inert bed 389  
 Current–voltage behaviour of bipolar membranes in concentrated salt solutions investigated with chronopotentiometry 455  
 An MHD-based treatment of electrolysis in magnetic fields generated inside a solenoid 551  
 Chlorine evolution in a centrifugal field 831  
 Electrocatalytic removal of dissolved oxygen from seawater in a packed-bed electrode 951  
 An approximate solution to the model of a sparged packed bed electrode reactor 1219

#### *Electrochemical synthesis*

- Electropolymerization of chlorinated phenols on a Pt electrode in alkaline solution. Part II: An electrochemical quartz crystal microbalance study 49  
 Electrosynthesis of 4,4'-dinitroazobenzene on PbO<sub>2</sub> electrodes 193  
 Electrochemical decomposition of bisphenol A using Pt/Ti and SnO<sub>2</sub>/Ti anodes 197  
 Electroreduction of nitrobenzene to *p*-aminophenol using voltammetric and semipilot scale preparative electrolysis techniques 217  
 Electrohydrogenation of 4-amino-5-nitrosodimethyluracil with a foamed nickel cathode 321  
 Cyclic voltammetric behaviour of polyfuran perchlorate doped films 447  
 Studies of the synthesis of sodium Ates (NaH<sub>2</sub>PO<sub>4</sub>, Na<sub>2</sub>HPO<sub>4</sub>, Na<sub>3</sub>PO<sub>4</sub>) using membrane electrolysis 537  
 Electropolymerization of chlorinated phenols on a Pt electrode in alkaline solution. Part IV: A gas chromatography mass spectrometry study 543  
 Electrolysis of V(IV) and free *meso*-tetraphenyl porphyrin in two immiscible liquids 569  
 The anodic behaviour of Ebonex® in oxalic acid solutions 583  
 Electrocatalytic hydrogenation of phenol in aqueous solutions at a Raney nickel electrode in the presence of cationic surfactants 603  
 Electropolymerization of chlorinated phenols on a Pt electrode in alkaline solution Part III: A Fourier transformed infrared spectroscopy study 755  
 Liquid-phase *p*-*t*-butyltoluene autoxidation enhanced by electrochemistry: Activation of the catalytic effect of cobalt acetate 839  
 Electrochemical enhancement of glucose oxidase kinetics: Gluconic acid production with anion exchange membrane reactor 1049  
 Electrolytic synthesis of succinic acid in a flow reactor with solid polymer electrolyte membrane 1189  
 Chlorophenol electrooxidation on iron oxide-covered aluminosilicates deposited on glassy carbon 1211  
 Influence of preparation process of MEA with mesocarbon microbeads supported Pt–Ru catalysts on methanol electrooxidation 1279

#### *Energy conversion, batteries and fuel cells*

- Ternary alkali carbonate composition-oxygen solubility relationship under atmospheric and pressurized conditions – a utility model for MCFC 111  
 Cu-based amorphous alloy electrodes for fuel cells 145  
 Electrochemical behaviour of Ni + Al alloy as an alternative material for molten carbonate fuel cell cathodes 179  
*In situ* microobservation of the cathode in molten carbonate fuel cells 185  
 Entropy change in lithium ion cells on charge and discharge 251  
 The influence of electrode morphology on the performance of a DMFC anode 259  
 Temperature dependence studies of a.c. impedance of lithium-ion cells 267  
 A novel silver oxide electrode and its charge–discharge performance 275  
 High specific surface area, reticulated current collectors for lead–acid batteries 287  
 Polarization effects in electrolyte/electrode-supported solid oxide fuel cells 339  
 Effects of the cathode gas diffusion layer characteristics on the performance of polymer electrolyte fuel cells 383  
 Nano-scale copper-coated graphite as anode material for lithium-ion batteries 679  
 Advanced Sn/C composite anodes for lithium ion batteries 687  
 Silver–carbon electrocatalyst for air cathodes in alkaline fuel cells 805  
 Characterization of membrane electrode assemblies in polymer electrolyte fuel cells using a.c. impedance spectroscopy 859  
 Electrochemical characterization of vacuum plasma sprayed thin-film solid oxide fuel cells (SOFC) for reduced operating temperatures 871  
 Deconvolution of electrochemical impedance spectra for the identification of electrode reaction mechanisms in solid oxide fuel cells 875  
 Study of a Li–Ni oxide mixture as a novel cathode for molten carbonate fuel cells by electrochemical impedance spectroscopy 929  
 Anode materials for lithium ion batteries from mild oxidation of natural graphite 1011  
 Synergistic effects of novel battery manufacturing processes for lead–acid batteries Part I: Charge/discharge cycling of batteries 1039  
 Synthesis and electrochemical performance of layered Li[L<sub>1-(2x)/3</sub>Ni<sub>x</sub>Mn<sub>(2-x)/3</sub>]O<sub>2</sub> cathode materials for lithium secondary batteries 1053  
 Novel bipolar electrodes for battery applications 1063  
 A novel non-flammable electrolyte containing methyl nonafluorobutyl ether for lithium secondary batteries 1071  
 Effect of oxygen flow rate on the structural and electrochemical properties of lithium nickel oxides synthesized by the sol–gel method 1229  
 A zinc–air cell employing a porous zinc electrode fabricated from zinc–graphite-natural biodegradable polymer paste 1347

*Instruments, sensors, methods*

- A Zn(II) ion-selective electrode based on chalcogenide  $\text{As}_2\text{Se}_3\text{-Sb}_2\text{Se}_3\text{-ZnSe}$  and  $\text{GeSe}_2\text{-ZnSe-ZnTe}$  glasses 281  
 Monitoring hydrogen absorption in Pd electrodes by means of electric and electrochemical signals 661  
 A simple testing method for quality control of phosphate coatings based on impedance measurements 891  
 EIS testing of new aluminium sacrificial anodes 897  
*In situ* electropolymerized polyaniline-polyacrylonitrile composite film for the construction of a polyphenol oxidase-based biosensor 1265

*Mass transfer and hydrodynamics*

- Mass transfer ambiguities in swirling pipe flows 25  
 Determination of mass diffusion overpotential distribution with flow pulse method from current distribution measurements in a PEMFC 1081

*Materials electrochemistry*

- Electrochemical characterization of radiation-grafted ion-exchange membranes based on different matrix polymers 11  
 Preparation of CdS thin films by electrodeposition: effect of colloidal sulfur particle stability on film composition 359  
 Porosity determination of nickel coatings on copper by anodic voltammetry 641  
 Asymmetric alumina membranes electrochemically formed in oxalic acid solution 977  
 Effect of pulse reversal on the properties of pulse plated  $\text{CdSe}_x\text{Te}_{1-x}$  thin films 1151  
 Carbon fibre cloth as an electrode material: electrical conductivity and mass transfer 1175  
 Influence of magnesium and aluminium ions on the copper a.c. deposition into aluminium anodic oxide film nanotubes 1201  
 Recycling and regeneration of used perfluorosulfonic membranes for polymer electrolyte fuel cells 1337

*Metal and alloy deposition and dissolution*

- Effect of electrolysis factors on crystal orientation and morphology of electrodeposited cobalt 43  
 Electrodeposition of compositionally modulated Au/Co alloy layers 97  
 Aluminium composite coatings containing micrometre and nanometre-sized particles electroplated from a non-aqueous electrolyte 123  
 Unsteady diffusion effects on electrodeposition into a submicron trench 135  
 Electrodeposition of Au-Sn alloys from alkaline baths 165  
 Initial stages of tin electrodeposition from sulfate baths in the presence of gluconate 225  
 Current oscillations during electrodisolution of iron in perchloric acid solutions 231  
 Kinetics of electroless copper deposition using cobalt(II)-ethylenediamine complex compounds as reducing agents 297  
 Galvanostatic and microscopic studies of nodulation during copper electrolysis 329  
 Effect of heat treatment on electroless ternary nickel-cobalt-phosphorus alloy 439  
 Effect of thiourea and saccharin on the roughness of electrodeposited ultrathin nickel and cobalt layers 621  
 Effects of boric acid on hydrogen evolution and internal stress in films deposited from a nickel sulfamate bath 629  
 Application of electrochemical techniques for the control of cracks and steel corrosion in concrete 635  
 Thick cobalt coatings obtained by electrodeposition 693  
 Influence of copper anion complexes on the incorporation of metal particles in polyaniline Part I: Copper citrate complex 701  
 Influence of copper anion complexes on the incorporation of metal particles in polyaniline Part II: Copper oxalate complex 709  
 Copper electrodeposition from a pH 3 sulfate electrolyte 743  
 Voltammetric and morphological characterization of copper electrodeposition from non-cyanide electrolyte 763  
 Properties of silver-antimony alloys electrodeposited from ferrocyanide-thiocyanate electrolytes 811  
 An electrochemical approach to total organic carbon control in printed circuit board copper sulfate plating baths Part I: Anode performances 961  
 Study of the mechanism of additives on copper dissolution in monoethanolamine-complexed cupric ion solution 987  
 Leaching behaviour of tin with oxygen in recycled phenolsulfonic acid tin plating solutions 1001  
 Electrodeposition of cobalt from gluconate electrolyte 1019  
 High-rate electrochemical dissolution of Ni-Cu alloys in nitrate electrolyte 1029  
 An *in situ* spectroelectrochemical Raman investigation of Au electrodeposition and electrodisolution in  $\text{KAu}(\text{CN})_2$  solution 1043  
 Measurement of polarization parameters impacting on electrodeposition morphology I: Theory and development of technique 1101  
 Electrodeposition and properties of cyclically modulated silver-antimony alloys 1141  
 Electrowinning of palladium using a modified cyclone reactor 1235  
 Electrochemical nucleation and growth of copper on chromium-plated electrodes 1247  
 An electrochemical approach to total organic carbon control in printed circuit board copper sulfate plating baths Part II: Overall system 1303  
 Hydrogen incorporation in Ni-P films prepared by electroless deposition 1331  
 Mechanism of copper electrodeposition by pulse current and its relation to current efficiency 1371  
 Nucleation during electrocrystallization of cobalt on glassy carbon (GC) 1391

*Mineral and metallurgical electrochemistry*

- Electrochemical recovery of silver from cyanide leaching solutions 473  
 Electrochemical regeneration of chrome etching solution 481  
 Electrochemical properties of Pb-Sb, Pb-Ca-Sn and  $\text{Pb-Co}_3\text{O}_4$  anodes in copper electrowinning 505  
 Anodic behaviour of alkaline solutions containing copper cyanide and sulfite on the graphite anode 1109  
 Anodic oxidation of copper cyanide on graphite anodes in alkaline solution 1119  
 An integrated approach to evaluate the leaching behaviour of silver from sulfide concentrates 1157  
 The electrochemical quartz crystal microbalance as a sensor in the gold thiosulfate leaching process 1167  
 Cementation and corrosion at a RDE: Changes in flow and transfer phenomena induced by surface roughness 1269  
 Some aspects of the electrochemistry of the flotation of pyrrhotite 1321

*Molten salt electrochemistry*

Molten  $V_2O_5/Cs_{0.9}K_{0.9}Na_{0.2}S_2O_7$  and  $V_2O_5/K_2S_2O_7$  catalysts as electrolytes in an electrocatalytic membrane separation device for  $SO_2$  removal 19

Influence of  $CaF_2$  and  $AlF_3$  on the kinetics and mechanism of the Al electrode reaction in cryolite melts with various alumina contents 305

Recycling wood pulping chemicals by molten salt electrolysis: cyclic voltammetry of mixtures containing  $Na_2CO_3$  and  $Na_2SO_4$  415

Electrochemical reduction of solutions of  $ReF_6$  in fused  $LiF-NaF-KF$  eutectic mixture 521

High-temperature electrochemical synthesis of carbides, silicides and borides of VI-group metals in ionic melts 573

Recycling kraft pulping chemicals: cyclic voltammetry of molten salt mixtures containing  $Na_2CO_3$ ,  $Na_2SO_4$ ,  $Na_2S/Na_2S_x$  and  $Na_2O/Na_2O_2$  725

Formation and size control of titanium particles by cathode discharge electrolysis of molten chloride 819

*Photoelectrochemistry*

Photoenhanced hydrogen insertion and transport in thiophene oligomers 91

Photochemical formation of palladium patterns on surface-modified polyimide resin 349

*Miscellaneous*

Rectification behaviour of some metal ion-metal interfaces and concentration cells 1379
