

## CONTENTS OF NEXT ISSUE

PMM Vol. 29, No. 4, 1965

- A.A. BARMIN, A.G. KULIKOVSKII and L.F. LOBANOVA: Linearized problem of supersonic flow at the entrance to the electrode region of a magnetohydrodynamic channel
- G.G. CHERNYI: Wings in hypersonic flow
- M.D. LADYZHENSII: Strong interaction between the boundary layer and the inviscid flow past a triangular wing
- N.S. MATVEEVA and V.V. SYCHEV: On the theory of strong interaction of the boundary layer with an inviscid hypersonic flow
- Iu.M. NIKOLAEV: Solution for a plane shock wave moving through a lightly curved interface of two media
- L.N. STRETENSKII: Formation of waves of finite amplitude by a fluid source
- N.V. ZVOLINSKII and G.V. RYKOV: Reflection and refraction of a plane plastic wave at the interface between two half-spaces
- V.V. NOVOZHILOV: On plastic cavitation
- I.I. VOROVICH: General representations of solutions of the equations in the theory of multilayer anisotropic shells
- A.L. GOL'DENVEIZER: On the errors of and possible corrections to classical linear shell theory
- S.M. KOLESNIKOV and K.P. STANIUKOVICH: Nonstationary adiabatic centrally-symmetric motions of matter in the general theory of relativity
- Ia.N. ROITENBERG: A corrigible horizontal gyrocompass
- V.N. KOSHIAKOV: On the application of the Rodrigues-Hamilton and Cayley-Klein parameters in the applied theory of gyroscopes
- E.I. KHARLAMOVA: Some solutions of the problem of motion of a body with a fixed point
- N.E. STAVRAKOVA: The principle of Hamilton-Ostrogradskii for systems with one-sided constraints
- I.M. MINDLIN and G.K. POZHARITSKII: On the stability of steady motions of a heavy body of revolution on an absolutely rough horizontal plane

Contents of next issue

- V.A. TROITSKII: Optimization of motion for a two-stage rocket
- K.G. VALEEV: On a case of integrable equations of perturbed motion of a satellite
- M.I. GUSEIN-ZADE: On necessary and sufficient conditions for the existence of decaying solutions of the plane problem of the theory of elasticity for a semistrip
- A.A. MOVCHAN: On one problem of stability of a pipe with a fluid flowing through it
- V.A. PAL'MOV: Thin shells acted on by broadband random loads
- A.V. KOLOS: Methods of refining the classical theory of bending and extension of plates
- V.M. ALEKSANDROV and B.I. SMETANIN: Equilibrium crack in a thin layer
- A.I. KALANDIHA: On the stresses in a piecewise homogeneous medium
- A.M. SKOBEEV: On the formulation of the problem of impact of a viscous-plastic bar
- V.L. KON'KOV: On the solution of some problems of the theory of probe measurements of semiconductor film parameters
- G.P. CHEREPANOV: On the theory of the normal combustion velocity
- E.G. SHIFRIN: On flows of an ideal gas whose sonic surface coincides with a characteristic surface
- R.V. BIRIKH: On the spectrum of small perturbations of plane-parallel Couette flow
