

## CONTENTS OF NEXT ISSUE

PMM Vol. 30, No. 2, 1966

- N.N. KRASOVSKII: On the problem of pursuit in the case of linear monotype objects
- M.S. CABRIELIAN: On the influence of dissipative and gyroscopic forces on the control and observability of mechanical systems
- Iu.I. NEIMARK and N.A. FUFAYEV: On stability of stationary motions of holonomic and nonholonomic systems
- V.F. PLESHAKOV and Iu. I. SIROTIN: Anisotropic vector functions of a vector argument
- N.N. LEBEDEV and I.P. SKAL'SKAIA: On an expansion of an arbitrary function in an integral of spherical functions
- A.I. TSEITLIN: On the method of dual integral equations and dual series and its applications to problems of mechanics
- A.N. RUKHOVETS and Ia. S. UFLIAND: On a class of dual integral equations and their applications to the theory of elasticity
- T.V. VILENSKAIA and I.I. VOROVICH: Asymptotic behavior of the solution of the problem of the theory of elasticity for a thin spherical shell
- O.S. RYZHOV: On the influence of viscosity and heat conduction on the propagation of sound impulses
- E.B. BYKHOVSKII: On self-similar solutions of the type of a propagating wave of a quasi-linear equation and system of equations, which describe the flow of water in an inclined channel
- A.N. KRAIKO: On the solution of variational problems of supersonic gas dynamics
- Iu.V. VANDAKUROV: On stability of a pulsating plasma cylinder
- B.V. ELISEEV: On the applicability of the theory of one-dimensional flow in the presence of Hall's currents
- E.V. ERMOLIN and A.F. SIDOROV: Some configurations of isentropic deflagration of two-dimensional explosions
- A.M. ANTONOV and W.R. HAYES: Analysis of hypersonic gas flow past blunt bodies
- B.M. BULAKH: On conditions at the head-jump in viscous gas flow past a blunt body
- R.V. BIRIKH: On small perturbations of plane parallel flow with cubic velocity profile
- R.N. RUDAKOV: On small perturbations of convective motions between vertical parallel planes

- R.D. BACHELIS and V.G. MELAMED: On non-uniqueness of stationary solution of the system of equations of the theory of combustion
- A.I. MIANNIL and U.K. NIGUL: On results of comparison of the method of grids and method of saddle-points in the analysis of a transitory wave process of deformation of plates
- M. MISHIKU and K. TEODOSIU: Solution with the aid of the theory of functions of a complex variable of the static plane problem of the theory of elasticity for heterogeneous isotropic bodies
- L.A. AGALOVIAN: Application of the method of asymptotic integration to the construction of an approximate theory of anisotropic shells
- V.R. NOSOV: On a problem occurring in the theory of optimum control with after-effects
- M.B. NEVEL'SON and R.Z. KHAS'MINSKII: On stability of a linear system with random disturbances of its parameters
- V.D. ANDREEV: On the solution of the Stokes' problem for a level surface, given in the form of a spheroid
- V.F. LIASHENKO: On the stability of a rigid body with a fixed point
