

CONTENTS OF NEXT ISSUE

PMM Vol. 30, No. 6, 1966

- F.L. CHERNOUS'KO: On the motion of a solid body with a cavity partly filled with a viscous liquid.
- G.S. SHELEMENT'EV: On stabilization of a nonholonomic system
- V.I. IUDOVICH: On the origin of convection
- V.P. DOKUCHAEV: On the linearized theory of flow around bodies. Method of force sources
- V.E. NEUVAZHAEV: Discharge of gas into vacuum with temperature at the boundary subject to exponential law
- Iu.V. AFANAS'EV, V.M. KROL', O.N. KROKHIN and I.V. NEMCHINOV: Gasdynamic processes in heating of a substance by laser radiation
- A.D. CHERNYSHOV: On the character of strong jumps in certain complex media
- S.S. GRIGORIAN and D.M. GRIGORIAN: Impact of a cone on a thin elastic membrane
- B.V. KOSTROV: Unsteady propagation of longitudinal shear cracks
- N.Kh. ARUTIUNIAN and A.A. BABLOIAN: Contact problems for a half-space with an inclusion
- G.M. VALOV: The first fundamental problem of the theory of elasticity for a rectangular parallelepiped
- V.E. VDOVIN and A.I. KUNIN: A theory of elasticity with spatial distribution of matter. Three dimensional complex structure
- V.L. BERDICHEVSKII: Use of variational methods in constructing models of continuous media with irreversible processes in the special theory of relativity
- V.A. ZHELNOROVICH: Spinor as an invariant
- L.I. BALABUKH and A.G. MOLCHANOV: A boundary value problem of the theory of oscillation with parameter-dependent boundary conditions
- I.M. BELEN'KII: On the problem of n -stationary centers
- Iu.M. SVIREZHEV: On the theory of fugoid motions

- V.A. SAMSONOV: On the stability of the equilibrium of a physical liquid-filled pendulum
- A.P. PROSKURIAKOV: On constructing periodic solutions of quasilinear non-self-contained systems with one degree of freedom, when amplitude equations possess multiple roots
- A.B. KURZHANSKII: On the problem of control for a system of differential equations with time lag
- M.B. NEVEL'SON: Some remarks concerning the stability of a linear stochastic system
- E.E. PEISAKH: On the kinetic foci of a conservative system for isoenergetic trajectories
- E.I. ANDRIANKIN: On certain self-modeling motions of gas in the presence of shock and detonation in a medium of varying density
- Iu.P. IVANILOV and G.N. IAKOVLEV: Steady convection in the presence of an external magnetic field
- R.V. BIRIKH: Remarks on the papers by R.V. BIRIKH: On the spectrum of small perturbations of plane-parallel Couette flow, PMM Vol. 29, No. 4, 1965, and On small perturbations of a plane-parallel flow with cubic velocity profile, PMM Vol. 30, No. 2, 1966
