

CONTENTS OF NEXT ISSUE

PMM Vol. 31, No. 4, 1967

- A.G. KULIKOVSKII and F.A. SLOBODKINA: On stability of arbitrary stationary flows in the vicinity of transonic points
- Iu.P. GUPALO and G.P. CHEREPANOV: The plane problem of pseudofluidization
- A.P. PROSKURIAKOV: On Poincaré's method in the theory of nonlinear oscillations (Cases of degeneration of the system)
- V.A. TROITSKII: On synthesis of optimum dampers
- R.F. NAGAEV and K.Sh. KHODZHAEV: Synchronous motions in a system of objects with supporting constraints
- S.S. GRIGORIAN: Some problems of the mathematical theory of deformation and fracture of solid rock strata
- V.A. LOMAKIN: Formulation in terms of moments of some statistical problems of the theory of elasticity
- A.A. BABLOIAN: Solution of some dual equations, encountered in problems of the theory of elasticity
- A.D. KOVALENKO: Development of the theory of hypergeometric functions in connection with problems of an elastic equilibrium of plates and shells
- N.A. KIL'CHEVSKII and E.F. LEVCHUK: On the determination of functions of kinetic stresses in problems of elastodynamics
- V.M. ALEKSANDROV and A.V. BELOKON': Asymptotic solution of a class of integral equations and its application in contact problems for cylindrical elastic bodies
- Iu.N. KUZ'MIN and Ia.S. UFLIAND: The contact problem of compression of an elastic layer by two punches
- N.A. ALFUTOV and L.I. BALABUKH: On the possibility of solving problems of stability of plates without prior determination of the initial state of stress
- L.S. SRUBSHCHIK: The nonstiffness of a spherical shell
- V.D. VYLEKZHANIN: Lower and upper bounds of the torsional rigidity of a prismatic shaft for steady creep
- B.A. SMOL'NIKOV: Generalization of the Euler case of motion of a rigid body
- V.G. DEGTIAREV: Investigation of stability of circular orbits of satellites in the normal gravitational field of the earth taking into account the dipole of the magnetic field
- I.A. NEPOMNIASHCHAIA and Iu.V. SAVEL'EV: Estimate of the region of existence of a limit cycle of a class of dynamic systems with cylindrical phase space
- M.F. DIMENTBERG: Subharmonic resonance in a system with randomly variable proper frequency
- V.A. PAL'MOV: Propagation of vibrations in a nonlinear dissipative medium
- V.A. RYKOV: Relaxation of a gas described by the kinetic Boltzmann equation
- G.S. BISNOVATYI-KOGAN: Flow of an ideal gas in a spherically symmetric gravity field taking into account radiative heat conduction of the radiation pressure
- N.V. KHUSNUTDINOVA: The limiting humidity profile during infiltration into uniform soil
